

## Dell OptiPlex GX280

## Dell | OptiPlex GX280

El sistema Dell™ OptiPlex™ GX280  
está disponible en dos diseños  
adicionales para aumentar la  
flexibilidad en entornos corporativos  
e institucionales.

### Chasis nuevo, mismo rendimiento

El modelo OptiPlex GX280, diseñado especialmente para incrementar la productividad de su empresa ya que ofrece hasta cinco veces el rendimiento de anteriores modelos de Dell, está ahora disponible en dos nuevas opciones de chasis. El objetivo es ofrecer niveles de calidad punteros en el sector, además de incorporar innovadores diseños respetuosos con el medio ambiente y facilitar su utilización.

La utilización de componentes internos idénticos a los del chasis GX280 permite obtener la misma protección de la inversión y los mismos avances tecnológicos, sin cambios significativos.

Diseñado por Dell, el nuevo chasis se centra en la gestión térmica para el funcionamiento a la máxima potencia, provocando el mínimo de ruido y obteniendo una óptima fiabilidad.

- HyperCool™ ofrece amplias mejoras en la gestión térmica diseñadas para reducir la temperatura ambiental e incrementar la fiabilidad global del sistema.

Las mejoras enfocadas a mejorar la capacidad de uso se basan en sugerencias directas de los clientes:

- El diseño actual del chasis incluye una puerta con pestillo que puede extraerse por completo para permitir el acceso sin herramientas a los componentes internos del sistema.
- Los indicadores de estado del sistema DirectDetect™ se encuentran en la parte frontal del chasis y consisten en:
  - Cuatro indicadores LED de diagnóstico, que informan del estado del sistema en 24 modos distintos, con lo que se reduce el tiempo dedicado a diagnósticos de Helpdesk.
  - Un LED de actividad de red que agiliza los diagnósticos del sistema en temas de redes.

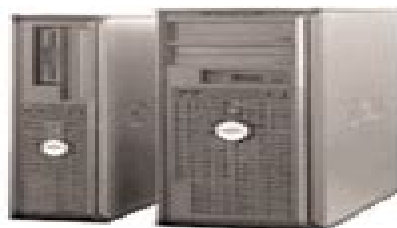

### El mismo nivel de estabilidad

El modelo GX280 seguirá ofreciendo el mismo nivel de estabilidad de plataforma gracias a los programas Dell dirigidos especialmente a clientes que estandarizan los sistemas en una sola imagen.

- Programa de garantía de la estabilidad de la imagen.
- Herramienta de gestión de las transmisiones ImageWatch™.
- Programa de estabilidad de las plataformas de la marca Intel®.
- Herramientas de gestión de la marca CFI de Dell y X-Image.

### Fácil de gestionar

El sistema de sobremesa OptiPlex serie 280 ofrece diagnósticos instantáneos que minimizan el tiempo de inactividad. Los diagnósticos residen en una pequeña partición de utilidad de la unidad de disco duro y pueden ejecutarse pulsando la tecla F12 tras iniciar el sistema. Se han diseñado para detectar componentes de hardware específicos y, a continuación, ejecutar varias pruebas en ellos a fin de resolver un determinado problema. En la mayoría de los casos, estos diagnósticos pueden atribuir problema al hardware o controlador, lo que simplifica aún más el proceso y permite reducir al máximo el tiempo de inactividad.
