traditions have since tended to treat the Trinity as at best superfluous and at worst redundant to modern formal ontologies. Yet the postmodern collapse of all such formal ontologies has prepared the path for a renewed study of metaphysics or ontology that shares in participation with the Trinity. New Trinitarian Ontologies names a creative response to this pivotal collapse of modern formal ontologies. If ontology cannot contain but rather more radically points to God and if all nature thus tends towards the supernatural, the angelic and the metaphysical, then we should renew the study of the metaphysics or ontology of the Trinity. This volume represents a collection of responses to this challenge of rendering ontology in a Trinitarian style.
