ESA under the coordination of the European Commission will further our scientific and operational observations of the seas. With Sentinel 3A in orbit and its twin Sentinel 3B following in 2017 there is a new category of data available for operational oceanographic applications and climate studies for years to come. These data are free and easy to access by anyone interested. Sergey Smirnov, Ataman Ozyildirim, Paulo Picchetti, 2018-08-15. This volume focuses on the analysis and measurement of business cycles in Brazil, Russia, India, China, and South Africa (BRICS). Divided into five parts, it begins with an overview of the main concepts and problems involved in monitoring and forecasting business cycles. Then it highlights the role of BRICS in the global economy and explores the interrelatedness of business cycles within BRICS. In turn, part two provides studies on the historical development of business cycles in the individual BRICS countries and describes the driving forces behind those cycles. Parts three and four present national business tendency surveys and composite cyclical indices for real time monitoring and forecasting of various BRICS economies, while the final part discusses how the lessons learned in the BRICS countries can be used for the analysis of business cycles and their socio-political consequences in other emerging countries.

Is Gwyneth Paltrow Wrong About Everything? Timothy Caulfield, 2016-05-10. An exploration of the effect our celebrity-dominated culture has on our ideas of what it means to live the good life. What would happen if an average Joe tried out for American Idol, underwent a professional makeover, endured Gwyneth Paltrow's Clean Cleanse, and followed the outrageous rituals of the rich and famous? Health law policy researcher Timothy Caulfield finds out in this thoroughly unique, engaging, and provocative book about celebrity culture and its iron grip on today's society. Over the past decade, our perceptions of beauty, health, success, and happiness have become increasingly framed by a popular culture steeped in celebrity influence and ever more disconnected from reality. Research tells us that our health decisions and goals are influenced by celebrity culture and endorsements; our children's ambitions are now overwhelmingly governed by the fantasy of fame, and the ideals of beauty and success are mediated through a celebrity-dominated worldview. But while much has been written about the cause of our obsession with the rich and famous, Caulfield argues that not enough has been done to debunk celebrity messages and promises about health, diet, beauty, or happiness. From super-thin models to Gwyneth Paltrow's endorsement of a gluten-free diet for almost anyone, celebrity opinions have the power to dominate our conversations and outlooks. In this book, Caulfield provides an entertaining look into the celebrity world, including vivid accounts of his own experiences trying out for American Idol, having his skin resurfaced, and doing the cleanse, interviews with actual celebrities, thought-provoking facts, and a practical and evidence-based reality check on our own celebrity ambitions. *The Digital Double Bind* Mohamed Zayani, Joe F. Khalil, 2024. The Middle East's digital turn has renewed hopes of socio-economic development and political change across the region, but it is also marked by stark contradictions and historical tensions.
