Market analysis of touch-enabled AiO PCs in the German consumer market. How Technology Adoption influences the traditional Marketing Mix
 Martin Asmus, 2019-05-13
 Bachelor Thesis from the year 2012 in the subject Business economics, Miscellaneous, grade 1.5, Furtwangen University, HFU Business School, language: English.
 Abstract: The subject of this work is to give the reader a detailed overview of the current state of the All-in-One PC market for German consumers. The author questions the public perception of All-in-One PCs in the consumers' minds. Also, the use and acceptance of touch technology for large screen devices is studied. The purpose of this thesis is to analyze how All-in-One PCs can be effectively marketed in an industry that focuses more and more on mobile computing devices. In the first part, an introduction to the desktop PC market and touch screen technology is given. Then, the theoretic concepts of strategic marketing and technoready marketing are discussed within a hypercompetitive and innovation-driven industry. The research part consists of a thorough market and competitive analysis of the All-in-One PC market in Germany. In addition, a conducted opinion survey provides valuable insights from a consumer perspective. The findings of the research are afterwards evaluated and interpreted. Thereupon, the originally outlined problem is reassessed, and recommendations are given to HP Germany, the cooperating company of this thesis, on how to adjust respective marketing activities for technological innovative products. Finally, a market outlook weighs the opportunities and threats that lie ahead for the product category All-in-One PC. The last chapter summarizes the key learnings of this thesis, how it benefits the cooperating company, and ends with a brief personal assessment about the topic by the author. The results of the market analysis suggest that HP can improve its brand preference and that people are not aware enough of the product All-in-One PC and its features and benefits. A more educative

marketing approach is proposed by adding a 5th P for pedagogy to the traditional marketing mix **Cyberphobia** Edward Lucas,2015-08-27 Crossing the road we look both ways Riding a bicycle at night we use lights So why is our attitude towards online security so relaxed Edward Lucas reveals the ways in which cyberspace is not the secure zone we may hope how passwords provide no significant obstacle to anyone intent on getting past them and how anonymity is easily accessible to anyone malign or benign willing to take a little time covering their tracks The internet was designed by a small group of computer scientists looking for a way to share information quickly In the last twenty years it has expanded rapidly to become a global information superhighway available to all comers but also wide open to those seeking invisibility This potential for anonymity means neither privacy nor secrecy are really possible for law abiding corporations or citizens As identities can be faked so easily the very foundations on which our political legal and economic systems are based are vulnerable Businesses governments national security organisations and even ordinary individuals are constantly at risk and with our ever increasing dependence on the internet and smart phone technology this threat is unlikely to diminish in fact the target for cyber criminals is expanding all the time Not only does Cyberphobia lay bare the dangers of the internet it also explores the most successful defensive cyber strategies options for tracking down transgressors and argues that we are moving into a post digital age where once again face to face communication will be the only interaction that really matters
