Effective Documentation for Occupational Therapy Jane D. Acquaviva, 1998

The New Face of Evaluation and Management Kellie Hall, 2025-06-30 Physicians want to care for patients not spend their time documenting in an electronic

medical record Physicians are always complaining about the amount of time they spend documenting patient care in support of medical billing through an evaluation and management coding system E M New guidelines were created to lessen the time a physician provider spends on documentation as many of the mandatory elements are no longer a requirement for calculating a code level Previously an E M evaluation and management note required documentation of history exam and medical decision making with required elements in each component to support a level for payment If an element was missing the level of service was not supported therefore the code was lowered resulting in a lower reimbursement for the physician provider The new guidelines eliminated the requirement of History and Exam as part of the calculation of a code level Yes an appropriate history and exam are required this supports good patient care but when it comes to reimbursement they are no longer part of the picture The overall system is not difficult if time is taken to understand the elements and how they are applied in the documentation Documentation is a word game always has been the authors focus is to show what words to use to lessen the time but still convey the complexity of the patient s condition and how the physician provider determines a treatment plan which includes the risk to the patient to satisfy the Coding guidelines initiated by Medicare and American Medical Association This book evaluates the new guidelines and brings them into prospective so physicians providers coders can easily understand how to document and calculate the level of service for reimbursement This is not a cumbersome book or complicated but straight to the point The main goal of the book is to educate physicians nurses and coders on what documentation is really required and what has just become habit over the last 30 years *Documenting Care* Frances Talaska Fischbach,1991 University of Wisconsin Milwaukee School of Nursing s comprehensive charting and documentation manual for students and practitioners [Straight to the Point Documentation Guide for LTC/SNF Nurses](#) Kik Nursing Strategies,2020-11-23 Tired Of Being Hassled for Documentation as a Nurse in a LTC SNF A Straight To The Point Guide From MDS Coordinators What Exactly It Is We Need From Your Medicare Documentation An easy to use reference made for Nurses in the long term care setting We have gathered that in Nursing school we re taught to document or it didn t happen and on the job tells you to document but you re never given the specifics of what exactly is needed This is why this reference guide was created by MDS Coordinators for LTC SNF Nurses Who better to hear it from than MDS Nurses themselves Bridging the knowledge gap 1 Nurse at a time [The Essential Guide to Coding in Obstetrics & Gynecology](#) Acog,2004
