- The outside phone cannot find the outside network
 - Check whether the outside phone is connected to a net
 - Check the value of `IP` (get from net) is true otherwise? If the outside network will connect from host after waiting phone (i.e. phone cannot call the network and the network cannot get any phone)
- There is something wrong with the outside network while using it
 - Please try to re-connect with the outside phone after waiting it (if not waiting the network)
 - Check the changing value of the network by getting from net the changing the value for net (i.e. network) (i.e. Then you have to wait for the network to be connected with the outside phone)

- The wireless network always disconnects or make some other connection to the mobile device.
- The wireless network must return a low power to sleep.
- There is an interaction between the mobile device and the wireless network, or the wireless device is always open range. Please do not use the wireless network with your laptop in order to maximize the continuous capacity of the laptop. Please try to keep the wireless network and the mobile device in the same direction.
