Olympic Cities John Gold, Margaret M Gold, 2016-07-11 The first edition of *Olympic Cities* published in 2007 provided a pioneering overview of the changing relationship between cities and the modern Olympic Games. This substantially revised and enlarged third edition builds on the success of its predecessors. The first of its three parts provides overviews of the urban legacy of the four component Olympic festivals: the Summer Games, Winter Games, Cultural Olympiads, and the Paralympics. The second part comprises systematic surveys of seven key aspects of activity involved in staging the Olympics: finance, place, promotion, the creation of Olympic Villages, security, urban regeneration, tourism, and transport. The final part consists of nine chronologically arranged portraits of host cities from 1936 to 2020, with particular emphasis on the six Summer Olympic and Paralympic Games of the twenty-first century. As controversy over the growing size and expense of the Olympics, with associated issues of accountability and legacy, continues unabated, this book's incisive and timely assessment of the Games' development and the complex agendas that host cities attach to the event will be essential reading for a wide audience. This will include not just urban and sports historians, urban geographers, event managers, and planners, but also anyone with an interest in the staging of mega-events and concerned with building a better understanding of the relationship between cities, sport, and culture.

Leadership in the Construction Industry George Ofori, Shamas-ur-Rehman Toor, 2021-03-07 This book presents a new framework for leadership in the construction industry, which draws from the authentic leadership construct. The framework has three major themes: self-leadership, self-transcendent leadership, and sustainable leadership. Despite its significance, leadership has not been given due importance in the construction industry, as focus is placed on managerial functionalism. At the project level, even with the technological advances in the industry in recent years, construction is realized in the form of people undertaking distinct interdependent activities which require effective leadership. The industry faces many challenges, including demanding client requirements and project parameters, more stringent regulations, codes, and systems, intense competition in the industry, and threats from disruptive enterprise. In such a complex environment, technology-driven and tool-based project and corporate management is insufficient. It must be complemented by a strategic, genuine stakeholder-focused and ethical leadership. *Leadership in the Construction Industry* is based on a study on authentic leadership and its development in Singapore.

Leadership theories and concepts are reviewed the importance of leadership in the construction industry is discussed and the grounded theory approach which was applied in the study is explained Many eminent construction professionals in Singapore were interviewed in the field study Emerging from the experiences of the leaders documented in this book are three major themes 1 self leadership how leaders engage in various self related processes such as self awareness self regulation and role modeling 2 self transcendent leadership how leaders go beyond leading themselves to leading others through servant leadership shared leadership spiritual leadership and socially responsible leadership and finally 3 sustainable leadership or the strategies leaders employ to make the impact of their leadership lasting A synthesis of these themes and their implications for leadership development is presented before the book concludes with some recommendations for current and aspiring leaders about how they can engage with them This book is essential reading for all construction practitioners from all backgrounds and researchers on leadership and management in construction [El-Hi Textbooks in Print](#) ,1984
