

# THE CLASSIC FIVE SENSES

## TACTILE

Tactile receptors on the skin identify the sensation of touch.

## AUDITORY

Auditory receptors, located in the inner ear identify loud, soft, high, near, and far noises.

## VISUAL

Visual stimuli are picked up by visual receptors in the eye and provide information about color contrast, shape, form, and movement.

## GUSTATORY

Taste is picked up by gustatory receptors in our tongues and linked to our olfactory senses (smell).

## OLFACTORY

Smell is processed through 'Olfactory' receptors located in the nose.

**How Much Inequality Is Fair?** Venkat Venkatasubramanian, 2017-08-08 Many in the United States feel that the nation s current level of economic inequality is unfair and that capitalism is not working for 90% of the population Yet some inequality is inevitable The question is What level of inequality is fair Mainstream economics has offered little guidance on fairness and the ideal distribution of income Political philosophy meanwhile has much to say about fairness yet relies on qualitative theories that cannot be verified by empirical data To address inequality we need to know what the goal is and for this we need a quantitative testable theory of fairness for free market capitalism How Much Inequality Is Fair synthesizes concepts from economics political philosophy game theory information theory statistical mechanics and systems engineering into a mathematical framework for a fair free market society The key to this framework is the insight that maximizing fairness means maximizing entropy which makes it possible to determine the fairest possible level of pay inequality The framework therefore provides a moral justification for capitalism in mathematical terms Venkat Venkatasubramanian also compares his theory s predictions to actual inequality data from various countries showing for instance that Scandinavia has near ideal fairness while the United States is markedly unfair and discusses the theory s implications for tax policy social programs and executive compensation
