This work attempts to prove that the Strategic Intervention Material SIM can significantly address the least mastered skills
and learning competencies from the K 12 curriculum guide Different and multiple activities were created in order to improve
and help the pupil understand difficult concepts about the subject Assessments were made and subjected to parallel testing
The activities were finalized and administered in an Elementary School with 23 Grade IV pupils as respondents The mean
mastery and performance level on the actual lesson and the utilization of SIM were computed Moreover results were
compared The mastery and performance level before and after the use of the Strategic Intervention Material were
interpreted It showed that there was a significant difference on the mastery and performance levels of pupils This suggests
that the utilization of SIM helps the pupils to master the difficult and least mastered competencies Resources in
