Models of Capitalism David Coates, 2015-01-28 The contemporary debate on economic policy is dominated by the issue of which model of capitalism works best      *Corporations and Cultural Industries* Scott W. Fitzgerald, 2012-01-01 Corporations and Cultural Industries Time Warner Bertelsmann and News Corporation by Scott Warren Fitzgerald fills an important neglected area in communication and media studies through its sustained theoretically grounded and empirically rich analysis of three of the most important global media conglomerates of our time Time Warner Bertelsmann and News Corp The book examines how financialization processes regear the internal operations of media corporations in a manner that pits one sector against another      The Political Economy of Mediterranean Europe Luis Cárdenas, Javier Arribas, 2024-08-19 Applying the demand led growth models framework this book examines the recent macroeconomic performance of the key Mediterranean economies Italy Spain Portugal and Greece including the responses to the economic and financial crisis 2008 the debt crisis 2010 and the COVID 19 crisis 2020 As the book explains the central idea of the growth model approach is that the widespread breakdown of the old labor institutions such as the existence of strong unions centralized wage bargaining and the participation of the workforce in corporate governance has led to a fall in the wage share and a rise in inequality in most advanced economies Thus the two main contemporary growth models are usually characterized as debt led and export led In both models the same processes that cumulatively drive growth such as over consumption also simultaneously undermine the foundations on which this expansion takes hold The book examines the extent to which these processes hold true for Mediterranean economics and explores the key factors of their economies including productive capacity growth of aggregate demand components wage led or profit led regimes personal income distribution the foreign sector the financial sector labor relations the labor market and welfare states In particular the book examines whether policy responses and state interventions in recent years have led to a divergence between the economies To what extent are these changes transforming the existing growth models Are we facing a change in the Mediterranean model or the disappearance of the Mediterranean bloc as a whole This book marks a significant addition to the literature on the economics and politics of Southern Europe and the fields of political economy comparative economics and macroeconomics more broadly      Labor in the Global Digital Economy Ursula Huws, 2014-12-05 For every person who reads this text on the printed page many more will read it on a computer screen or mobile device It is a situation that we increasingly take for granted in our digital era and while it is indicative of the novelty of twenty first century capitalism it is also the key to understanding its driving force the relentless impulse to commodify our lives in every aspect Ursula Huws ties together disparate economic cultural and political phenomena of the last few decades to form a provocative narrative about the shape of the global capitalist economy at present She examines the way that advanced information and communications technology has opened up new fields of capital accumulation in culture and the arts in the privatization of public services and in the commodification of human

sociality by way of mobile devices and social networking These trends are in turn accompanied by the dramatic restructuring of work arrangements opening the way for new contradictions and new forms of labor solidarity and struggle around the planet Labor in the Global Digital Economy is a forceful critique of our dizzying contemporary moment one that goes beyond notions of mere connectedness or free flowing information to illuminate the entrenched mechanisms of exploitation and control at the core of capitalism

**Cities for the Many Not the Few** Ash Amin, Doreen B. Massey, N. J. Thrift, 2000 Cities are the focus of much of our national life So it is right that cities are a focus of government policy after many years of neglect However New Labour policy on cities still in the making lacks a framing vision of what cities are for who they are for what kinds of societies they might most democratically embody Cities for the many not the few reflects on the development of policy towards cities so far by asking some of the bigger questions about how we might imagine cities in this new century The authors question the belief that the future of cities lies in just the knowledge economy Further they claim that current government thoughts on who should make decisions in cities lacks an overall conception of urban citizenship The case is argued for a strategy that seeks empowerment across the social spectrum which feels comfortable with the reconstruction of cities as plural and open Cities for the many not the few is essential reading for researchers practitioners and activists interested in the future of urban life
