## **Modern Architecture By William Curtis:**

**Modern Architecture Since 1900** William J. R. Curtis, 1987 A penetrating analysis of the modern architectural tradition and its origins Since its first publication in 1982 Modern Architecture Since 1900 has become established as a contemporary classic Worldwide in scope it combines a clear historical outline with masterly analysis and interpretation Technical economic social and intellectual developments are brought together in a comprehensive narrative which provides a setting for the detailed examination of buildings Throughout the book the author's focus is on the individual architect and on the qualities that give outstanding buildings their lasting value For the third edition the text has been radically revised and expanded incorporating much new material and a fresh appreciation of regional identity and variety Seven chapters are entirely new including expanded coverage of recent world architecture Described by James Ackerman of Harvard University as immeasurably the finest work covering this field in existence this book presents a penetrating analysis of the modern tradition and its origins tracing the creative interaction between old and new that has generated such an astonishing richness of architectural forms across the world and throughout the century Le Corbusier William J.R. Curtis, 1994-01-01 A study of Le Corbusier and his influence on twentieth century architecture **Beyond Modernist Masters** Felipe Hernández, 2009-11-20 Latin America has been an important place for architecture for many decades Masters like Barragán Dieste Lina Bo Bardi and Niemeyer pointed the way for architectural design all over the world and they continue to do so today Their approach to colors materials and walls had a deep and lasting influence on architectural modernism Since then however and especially in the last fifteen years architecture on the continent has continued to evolve and a lively and extremely creative architecture scene has developed The work of Latin American architects and city planners is often guided by social issues for example the approach to informal settlements on the outskirts of big cities the scarcity of housing and public space the availability of affordable transportation and the important role of cultural infrastructure such as schools libraries and sports facilities as a catalyst for neighborhoods Within this context the book considers numerous projects that have prompted discussion and provided fresh impetus all across Latin America Outstanding projects like the Santo Domingo Library in Medellín Colombia by Giancarlo Mazzanti Alberto Kalach's Liceo Franco Mexicano in Mexico and the works of Alejandro Aravena in Chile show that recent Latin American architecture is more than capable of holding its own beside the works of the founders Felipe Hernández is an architect and professor of Architectural Design History and Theory at The University of Liverpool He attended an MA in Architecture and Critical Theory graduating with distinction in 1998 and received his PhD from the University of Nottingham in 2003 He has taught at the Bartlett School of Architecture UCL The Universities of Nottingham Sheffield East London and Nottingham Trent in the United Kingdom as well as at Brown University and Roger Williams University in USA Felipe has published numerous essays and articles examining the situation of contemporary Latin American cities and revealing the multiplicity of architectural practices that operate simultaneously in

the constant re shaping of the continent s cities      **Le Corbusier** William J R Curtis,2015-04-20 An expanded edition on the master of Modernism Le Corbusier by award winning architectural historian William J R Curtis Originally published in 1996 to critical fanfair scholar William J R Curtis has re issued his classic text with extensive new scholarship and contemporary research that continues the high standard of the original Presented chronologically with a clear narrative Curtis has worked tirelessly not only to document Le Corbusier s key projects in detail but to contextualize them within the architect s overarching philosophy of urbanism and art and the pervading culture of Le Corbusier s time With full access to the renowned Le Corbusier archive Curtis text is lavishly illustrated with new photographs plans and original sketches and a fresh new design Praise for the first edition This is not only the best single work on Le Corbusier a model of scholarship erudite yet eminently readable it is also an invaluable analysis of the creative architectural process It should be read and re read by every student of architecture Building Design William J R Curtis is the best architectural historian writing in the English language Chicago Tribune      *Utopias and Architecture* Nathaniel Coleman,2005 A detailed and innovative re assessment of the work of three architects Le Corbusier Louis I Kahn and Aldo van Eyck who sought to represent a utopian content in their work      **Constructing Identity in Contemporary Architecture** Peter Herrle,Stephanus Schmitz,2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore      [A Vision of Place](#) William Curtis,Russell Windham,2017 Since the beginnings of their architectural practice in 1992 William Curtis and Russell Windham have dedicated their work to the principle that classical architecture in its best sense should embody the same rigor the same attention to surroundings and the same thoughtful approach to design theory that fuels the most forward looking styles and movements In this graciously appointed book Curtis and Windham reflect on more than two decades of the practice of classical contemporary architecture providing an expansive view of eighteen representative projects Opening with a contextualizing introduction by esteemed architectural historian Stephen Fox *A Vision of Place* documents the authors quiet assertion that carefully considered work performed along traditional lines can be in its own way groundbreaking Curtis and Windham demonstrate the versatility of classical ideals and methods for instilling a contemporary resonance of place      [The](#)

Contested Territory of Architectural Theory Elie G. Haddad, 2022-10-21 This book brings together a diverse group of theoreticians to explore architectural theory as a discipline assessing its condition and relevance to contemporary practice. Offering critical assessment in the face of major social and environmental issues of today, 17 original contributions address the relevance of architectural theory in the contemporary world from various perspectives including but not limited to politics, gender, representation, race, environmental crisis, and history. The chapters are grouped into two distinct sections: the first section explores various historical perspectives on architectural theory, mapping theory's historiographical turn and its emergence and decline from the 1960s to the present; the second offers alternative visions and new directions for architectural theory incorporating feminist and human rights perspectives and addressing contemporary issues such as Artificial Intelligence and the Age of Acceleration. This edited collection features contributions from renowned scholars as well as emergent voices with a Foreword by David Leatherbarrow. This book will be of great interest to graduate and upper level students of architecture as well as academics and practicing architects.

**Interior Design Masters** Mark Hinchman, Elyssa Yoneda, 2018-06-27 Interior Design Masters contains 300 biographical entries of people who have significantly impacted design. They are the people, historical and contemporary, that students and practitioners should know. Coverage starts in the late Renaissance with a focus on the twentieth and twenty-first centuries. The book has five sections with the entries alphabetical in each so it can serve as a history textbook and a reference guide. The seventeenth and eighteenth century section covers figures from Thomas Chippendale to Horace Walpole. The nineteenth century section includes William Morris and Candace Wheeler. The early twentieth century section presents modernism's design heroes including Marcel Breuer, Eileen Gray, and Gilbert Rohde. The post-World War II designers range from Madeleine Castaing to Raymond Loewy. The final contemporary section includes Ron Arad and the Bouroullec brothers. These are the canonical figures who belong to any design history. The book also contains less well-known figures who deserve attention such as Betty Joel, the British art deco furniture designer Paul Veyseyre, the Frenchman active in China in the 1930s, and more recently, Lanzavecchia Wai, the Italian-Singaporean duo whose work ranges from health care to helicopters. Global in its coverage, the book is richly illustrated with over 600 black and white and color photographs.

**Architectural Regionalism** Vincent B. Canizaro, 2012-03-20 In this rapidly globalizing world, any investigation of architecture inevitably leads to considerations of regionalism. But despite its omnipresence in contemporary practice and theory, architectural regionalism remains a fluid concept; its historical development and current influence largely undocumented. This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term. Authored by important critics, historians, and architects such as Kenneth Frampton, Lewis Mumford, Sigfried Giedion, and Alan Colquhoun, Architectural Regionalism represents the history of regionalist thinking in architecture from the early twentieth century to today.

Summerson and Hitchcock Frank E. Salmon, 2006 Publisher description      *The Architectural Review*, 1987      Boston, Forty Years of

Modern Architecture Institute of Contemporary Art (Boston, Mass.),1980      *Modern Architecture, Mythical Landscapes & Ancient Ruins* William J. R. Curtis,1997      **Contemporary Architects** Ann Lee Morgan,Colin Naylor,1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor s note      The British Architect ,1913      **Architect** ,1911      **The Architect and Contract Reporter** ,1913      **Monumentality and the City** ,1984      **The Builder** ,1905
