Chapter 4 Active Reading Guide **A Tour of the Cell**

Section 1

1. The study of cells has been limited by their small size, and so they were not seen and described until 1665, when Robert Hooke first looked at dead cells from an oak tree. His contemporary, Anton van Leeuwenhoek, crafted lenses and with the improvements in optical aids, a new world was opened. *Magnification and resolving power* limit what can be seen. Explain the difference.
2. The development of electron microscopes has further opened our window on the cell and its organelles. What is considered a major disadvantage of electron microscopes?
3. Study the electron micrographs in your text. Describe the different types of images obtained from:
scanning electron microscopy (SEM):

transmission electron microscopy (TEM):
4. In *cell fractionation*, whole cells are broken up in a blender, and this slurry is centrifuged several times. Each time, smaller and smaller cell parts are isolated. This will isolate different organelles and allow study of their biochemical activities. Which organelles are the smallest ones isolated in this procedure?

Section 2

5. Which two domains consist of prokaryotic cells?
6. A major difference between prokaryotic and eukaryotic cells is the location of their DNA. Describe this difference.

Modern Biology Active Reading Guide Answer

Thomas Griffiths

Modern Biology Active Reading Guide Answer:

As recognized, adventure as skillfully as experience more or less lesson, amusement, as with ease as covenant can be gotten by just checking out a book **Modern Biology Active Reading Guide Answer** also it is not directly done, you could put up with even more around this life, all but the world.

We have enough money you this proper as competently as simple pretentiousness to get those all. We have the funds for Modern Biology Active Reading Guide Answer and numerous ebook collections from fictions to scientific research in any way. along with them is this Modern Biology Active Reading Guide Answer that can be your partner.
