

The Kronos 4500 Touch ID Terminal

Today, a critical workplace issue is forcing organizations to reconsider their methods for verifying employees' identities as they submit labor data. "Buddy punching" — one employee entering time and attendance data for another — has always had a negative impact on labor costs, payroll accuracy, and overall labor management. Buddy punching can't be completely eliminated with badge-based time and attendance systems alone. This issue is causing today's organizations to look for a reliable, accurate, and affordable alternative for verifying employees' identification.

Now there is a solution: the Kronos 4500 Touch ID terminal. The Kronos 4500 Touch ID terminal provides an easy-to-use method for accurately verifying your employees' identity during the labor data collection process. Implementing the Kronos 4500 Touch ID terminal gives you a fast and reliable way of verifying employees' identities, so you can eliminate buddy punching and the shift of work hours within your organization. Without these concerns, you can focus on more important issues, such as improving labor management and increasing your organization's competitive advantage.

Improving control over labor costs

One of the most significant benefits of the Kronos 4500 Touch ID terminal is the positive impact it can have on payroll accuracy and labor costs. While traditional time and attendance systems have been very effective in minimizing data entry errors from manual timekeeping systems, payroll inaccuracies — and inflated labor costs — persist when employees continue to enter labor data for each other. The Kronos 4500 Touch ID terminal gives you the tool to effectively eliminate buddy punching in your organization.

Every employee's fingerprint is unique, so using fingerprints as a way of verifying employee identity is a foolproof method of preventing employees from entering labor data inappropriately. You can rest assured that the actual employee is present as his/her labor data is collected. No more buddy punching. No more time theft. The Kronos 4500 Touch ID terminal solves these problems, so you can reduce labor expenses and improve control over costs. And having the right employees in the right place at the right time leads to improved efficiencies, increased productivity, and better management headcounts.

Accurate and private fingerprint data

The Kronos 4500 Touch ID terminal is extremely accurate and reliable, but at the same time, it provides safeguards that ensure your employees' privacy is protected at all times. Here's how the enrollment process works:

- An employee enrolls one or two fingers from either the left or right hand by placing them on a scanning device. Enrolling two fingers gives you the option of using the secondary fingerprint as a backup in case the primary finger is injured or not usable.
- When the finger is scanned, the Kronos 4500 Touch ID Enrollment Software measures finger characteristics, translates the captured data into a 546-byte binary "template," and stores it for later verification purposes. The Kronos 4500 Touch ID terminal even provides you with visual feedback to help achieve successful enrollment. The entire process is extremely fast and easy.

The Kronos 4500 Touch ID terminal accurately and consistently verifies employees' identities, which helps prevent buddy punching.
