*Assessing the Validity of the Qualistar Early Learning Quality Rating and Improvement System as a Tool for Improving Child-Care Quality* Gail L. Zellman, Michal Perlman, Vi-Nhuan Le, Claude Messan Setodji, 2008-06-26 As a result of the generally low quality of child care in the United States quality rating and improvement systems QRISs are proliferating in the child care arena This study examines the QRIS developed by Qualistar Early Learning a nonprofit organization based in Colorado evaluating how reliable the system s components are whether the QRIS process helped providers to improve and whether and how much children benefit from such improvement      *Observation and Recording* , 1996 This training guide is

intended to enhance the skills of Head Start education staff so they can accurately and objectively observe record and interpret young children's behavior and make thoughtful decisions about program planning for each child. Each of the modules in the guide details module outcomes, key concepts and background information. Module 1 assists participants in identifying and using a variety of observational methods matching observation goals to observation techniques and writing a running record accurately and objectively. Module 2 addresses overcoming observation challenges and provides staff members with practice in identifying and challenging their personal biases which could interfere with conducting and recording observations objectively. Module 3 addresses enhancing staff's ability to involve parents in the observation process and work with them as partners. Module 4 addresses interpreting and using observation results and serves to increase staff's ability to make valid inferences and draw meaningful conclusions from collected observation data. Contains resources. Five appendices provide sample observation records, a description of observation instruments and other information. SD

Kent Chrisman, 2016-03-15

The general public often views early childhood education as either simply babysitting or as preparation for later learning. Of course both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development: physical, cognitive, language, social, emotional, aesthetic, as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: How is the field of early childhood education defined? What are the roots of this field of study? How is the history of early childhood education similar to yet different from the study of public education? What are the major influences on understandings of best practices in early childhood education?
