chemical development in detail Overall there is a cooperative evolution of a chemical system driven by capture of energy mainly from the sun and its degradation in which the chemistry of both the environment and organisms are facilitating intermediates We shall suggest that the overall drive of the whole joint system is to optimise the rate of this energy degradation Since the environmental changes are inorganic and relatively fast they move inevitably to equilibrium The living part of the system the organisms under the influence of this inevitable environmental change are forced to follow but as they are increasingly energised and their reactions are slow they move further away from equilibrium We are able to explore the ways in which this chemical system evolved recognising that as complexity of the chemistry of organisms increased they had to be formed from more and more compartments and to become part of a chemically cooperative overall activity They could not remain as isolated species Only in the last chapter do we attempt to make a connection between the changing chemistry of organisms with the coded molecules of each cell which have to exist to explain reproduction

Striedter, 2022-08-02 How biomedical research using various animal species and in vitro cellular systems has resulted in both major successes and translational failure In Model Systems in Biology comparative neurobiologist Georg Striedter examines how biomedical researchers have used animal species and in vitro cellular systems to understand and develop treatments for human diseases ranging from cancer and polio to Alzheimer s disease and schizophrenia Although there have been some major successes much of this translational research on model systems has failed to generalize to humans Striedter explores the history of such research focusing on the models used and considering the question of model selection from a variety of perspectives the philosophical the historical and that of practicing biologists Striedter reviews some philosophical concepts and ethical issues including concerns over animal
