Investigation of the Pattern Grading Assumptions Used in the Sizing of U.S. Women's Clothing for the Upper Torso Nancy Ackerman Schofield,2000 The author of this thesis suggests that the U S women s sizing system for clothing is not meeting the needs of the population The grading process used by clothing manufacturers to create garments in a range of sizes for production has not been addressed Grade rules increments between garment measurements should be directly related to increments between body measurements for different sizes The major research questions addressed the relationship of grading to sizing and the basis for both sizing and grading practices This research focused on patterns and fit for the women s upper torso Sizing charts dating from 1873 through 2000 were examined The increments between sizes were calculated for each measurement and compared across time This research concluded that the method by which manufactured garments are sized grading has little relationship to sizing measurements Grading is primarily based on the premise that the changes to the measurements of the garment are set increments and proportions In addition many elements of the garment pattern were expected to have constant relationships *Readers' Guide* ,1912 *The Science of Grading Patterns for Men's, Boys' and Children's Clothing* Harry Simons,2023-07-18 This comprehensive guide provides detailed instructions on how to grade patterns for men s boys and children s clothing With illustrations and clear explanations this book is essential for anyone interested in garment design and production This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Manual Training Magazine** Charles
