Between the third to seventh centuries of the common era Jewish communities throughout the Eastern Mediterranean began to adorn their synagogues with figural illustrations inspired by the Hebrew Bible Although the Bible had long been the cornerstone of Jewish life it was only in late antiquity that its patriarchs prophets and heroes entered the Jewish visual lexicon Through careful consideration of the rich history of Jewish biblical interpretation alongside similar motifs in Near Eastern Greco Roman and Christian visual culture this book challenges the reader to consider the relationship between late antique Jewish biblical art synagogue rituals rabbinic teachings and exemplary paradigms **The Routledge**

**International Handbook of Constructivist Grounded Theory in Educational Research** Elaine Keane, Robert Thornberg, 2024-09-02 The Routledge International Handbook of Constructivist Grounded Theory in Educational Research provides a comprehensive overview of the state of the art in Constructivist Grounded Theory CGT methodology including

core grounded theory tenets and processes as well as constructivist adaptations. It features CGT research from across the education sector including studies based in primary schooling, post primary, second level schooling and higher education. Across 5 parts and 20 chapters, the book makes explicit how CGT techniques and processes were implemented in the field, the ways in which challenges were navigated and how educational researchers aligned their research processes to constructivist principles. It offers exemplars of good practice by educational researchers from Australia, Ireland, Italy, Norway, Sweden, Switzerland, the UK and the USA. The Handbook synthesises learning from the experiences of CGT researchers in education to establish a framework of guidance for early career and more experienced researchers. Additionally, it directly interrogates and considers how to address challenges in the implementation of high quality CGT and looks to the future of the methodology in educational research. This Handbook provides guidance and education specific examples to doctoral students and researchers who wish to use or are using CGT in educational research. It will also be of significant interest to qualitative researchers in other disciplines like sociology, psychology and nursing.

*Doing Interpretive Research* Koen P. R. Bartels, Hendrik Wagenaar, 2025-05-13. Interpretivism has an intuitive appeal to many social researchers but they often feel ill equipped to do it. Other social researchers tend to believe that interpretivism is a specialized niche with little relevance to their research practice. What has been lost is the awareness that interpretation is an explanatory logic and form of inquiry that is at the root of all social science research including quantitative research. In this volume, the authors guide social researchers and instructors in better understanding and improving the experience of doing interpretive research. They explore the centrality of experience in learning and teaching interpretive research, paying special attention to the role of emotions in the learning process and the way that negative emotions such as doubt and anxiety can impart learning. The authors provide a novel approach to methods teaching by offering a set of heuristics, open ended strategies of inquiry and discovery for improving the practice of social research. Uniquely, they demonstrate how emotions can be leveraged in the learning process to uncover surprising new insights about social reality and unlock researchers' imagination. They reveal how social researchers engaged or interested in interpretivism in learning can turn their research into an enjoyable, productive and imaginative experience.

**Program Evaluation** Susan P. Giancola, 2025-04-14. This text aims to build evaluation capacity by increasing knowledge about evaluation and improving skills to conduct evaluations. The book's embedded approach uses program theory to understand relationships between activities and objectives, logic modeling to represent the program's theory, and an evaluation matrix to structure the evaluation within the program. The approach is systematic and focused on continuous improvement. The Second Edition adds topics suggested by users of the book, incorporates content that the author has added to her own classes and covers emerging areas in evaluation since the publication of the first edition, such as artificial intelligence and equity in evaluation. A companion website at <http://edge.sagepub.com/Giancola2e> includes a number of instructor resources including editable PowerPoint slides and assignments.
