misinformation and disinformation which was rife during the campaign and media reporting of it The role that civil society and corporate Australia played in the campaign is considered The Voice campaign will be placed in the context of Aboriginal and Torres Strait Islander politics and previous attempts at representation The book will also place the call for Voice in the context of its ongoing relevance and imperative in Aboriginal and Torres Strait Islander affairs explaining the power of representation the Voice as an expression of sovereignty and the need for Voice to pursue other structural reforms such as treaty and to realise the promise of land rights The book concludes by reflecting on the role that history played in the campaign and the implications of the campaign for the practice of Australian history The book holds lessons for future constitutional change Indigenous recognition structural reform and Australia s democracy It also looks with constructive pragmatism at the future direction of First Nations structural reform in Australia and the practice of democracy

Arab Middle Class ,2014 The present report studies the Arab middle class an important social group that is relatively little understood despite the fundamental role it has played in shaping the economic and social development outcomes in the Arab region This report contributes to the ongoing debate about factors that led to the Arab uprisings and the difficult transitions to democracy that followed the departure of long standing dictators by marking elements influencing middle class allegiances specifically those that weakened their well established alliances with ruling regimes The report is motivated by the conviction on the basis of past development experiences that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition Studying the middle class is therefore crucial to interpreting the past understanding the present and reading the potential future development prospects of the Arab region This report introduces three novel approaches aimed at charting a path for sustaining empowering and enlarging the middle class The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure The second relates to the profiling of the Arab middle class using variables such as education employment and mobility in addition to multidimensional poverty The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental State Publisher s description
