Designing with Light J. Michael Gillette, 2003 Presents a survey of the practical and aesthetic aspects of basic stage lighting design This title treats its subject as an art closely integrated with that of the director actor and playwright and as a craft that provides practical solutions for the manipulation of stage space

Movies and Meaning Stephen Prince, 2004 This comprehensive introduction to film focuses on three topics how movies express meanings how viewers understand those meanings and how cinema functions globally as both an art and a business Using clear accessible and jargon free writing this is the only introductory film text to examine the elements of film style and the viewer's contribution to the cinema experience How do viewers interpret the effects filmmakers create How do filmmakers anticipate and build on the likely ways viewers will react to certain kinds of stories and audio visual designs The text examines both how filmmakers create images and sounds and the mechanisms and processes by which viewers make sense of images and stories on screen This approach helps students understand not only the basic concepts but also how their own reactions and opinions impact the overall film experience

Colour Films in Britain Sarah Street, 2019-07-25 How did the coming of colour change the British film industry Unlike sound the arrival of colour did not revolutionise the industry overnight For British film makers and enthusiasts colour was a controversial topic While it was greeted by some as an exciting development with scope for developing a uniquely British aesthetic others were deeply concerned How would audiences accustomed to seeing black and white films which were commonly regarded as being superior to their garish colour counterparts react Yet despite this initial trepidation colour captivated many British inventors and film makers Using different colour processes these innovators produced films that demonstrated remarkable experimentation and quality Sarah Street's illuminating study is the first to trace the history of colour in British cinema and

analyses the use of colour in a range of films both fiction and non fiction including *The Open Road* *The Glorious Adventure* *This is Colour* *Blithe Spirit* *This Happy Breed* *Black Narcissus* *The Red Shoes* *The Tales of Hoffmann* and *Moulin Rouge*. Beautifully illustrated with full colour film stills this important study provides fascinating insights into the complex process whereby the challenges and opportunities of new technologies are negotiated within creative practice. The book also includes a Technical Appendix by Simon Brown Kingston University UK which provides further details of the range of colour processes used by British film makers.
