The disputes that arise between host states and investors in the energy sector put a high number of valuable and vital projects in the countries at risk Investment treaty arbitration mechanisms as the traditional remedy have provided a solution to these problems for decades However as the number of disputes increases the sufficiency of arbitration in responding to disputes became questionable in addition to the long lasting and costly cases Accordingly ADR mechanisms outside the arbitration cannon have triggered growing interest among practitioners Despite the attraction and the apparent benefits of ADR such as being cheaper faster and with better outcomes compared to arbitration there are also hurdles in front that hinder the application of ADR This has lead to the underuse of ADR in appropriate contexts This study has been conducted to research the gap for the applicability of the ADR methods for investment disputes in the energy sector with the doctrinal analysis of the existing literature either promoting or opposing ADR Its findings provide guidance for alternative dispute resolution practitioners on when to use ADR how to use ADR and on what disputes ADR to be used to resolve conflicts in International Energy Investment *Practical Radicals* Deepak Bhargava, Stephanie Luce, 2023-11-07 A clear expert and inspiring guide to social change based on case studies of grassroots movements that won from two leading community and labor experts Our

Approaches to Conflict Resolution Arnold Gerstein, James Reagan, 1986 This is a book about making peace but it is new in tone there is no call for sacrifice here nor for altruism but a steady insistence on realism in the pursuit of one's interests In pursuing win-win strategies the participants in conflict seek their advantage What is new is the realization that this can often be gained without the discomfiture of competitors Solutions that satisfy one's competitor's needs as well as one's own tend to be lasting The broad purpose of this volume is to introduce and illustrate a framework that looks to solutions that are maximally satisfying and minimally damaging to each of the parties Foreword **Community-based Forest Resource**
