Melting Away Images Of The Arctic And Antarctic:

Melting Away Camille Seaman, 2014-12-02 For ten years Camille Seaman has documented the rapidly changing landscapes of Earth's polar regions. As an expedition photographer aboard small ships in the Arctic and Antarctic she has chronicled the accelerating effects of global warming on the jagged face of nearly fifty thousand icebergs. Seaman's unique perspective of the landscape is entwined with her Native American upbringing; she sees no two icebergs as alike; each responds to its environment uniquely, almost as if they were living beings. Through Seaman's lens, each towering chunk of ice, breathtakingly beautiful in layers of smoky gray and turquoise blue, takes on a distinct personality, giving her work the feel of majestic portraiture. *Melting Away* collects seventy-five of Seaman's most captivating photographs: life-affirming images that reveal not only what we have already lost but more importantly, what we still have that is worth fighting to save.

Environmental Communication and the Public Sphere Phaedra C. Pezzullo, Robert Cox, 2017-10-24 The fifth edition of this award-winning text remains the most comprehensive introduction in the growing field of environmental communication, offering insights into real-world applications of the topic and exploring recent events such as the Trump Administration, the People's Climate March, and international legal precedents. *Environmental Communication and the Public Sphere* Robert Cox, Phaedra C. Pezzullo, 2015-04-17 The Fourth Edition of *Environmental Communication and the Public Sphere* remains the only comprehensive introduction to the growing field of environmental communication, ranging from an historical overview of key terms to important legal and technological developments. This innovative book focuses on how human communication influences the way we perceive and act in the environment. It also examines how we interpret environmental problems and decide what actions to take with regard to the natural world. Three-time president of the Sierra Club, the largest environmental group in the United States, lead author Robert Cox leverages his vast experience to offer insights into the news media, Congress, environmental conflict, advocacy campaigns, and other real-world applications of environmental communication. New coauthor Phaedra Pezzullo brings two decades of applied experience working with grassroots environmental justice and health organizations, citizen advisory boards, and student-led campaigns, as well as her internationally recognized research on toxic pollution, social injustices, public advocacy, and more. The authors introduce the reader to the major areas, terms, and debates of this evolving field. The Fourth Edition incorporates major revisions that include four new chapters on visual and popular culture, digital media, and activism; the sustainability of college and corporation campuses; and the legal standing of citizens and nature. Updates throughout the text draw on timely topics, including visual communication used in climate science campaigns, fracking, and challenges to the right to know, plastic bag bans, consumer apps, digital activism for environmental justice, green marketing, and arguments on giving legal rights to nonhuman entities, from dolphins to rivers. **The Atlas of Global Conservation** Jonathan M. simply geophysical and biochemical They are societal and cultural and they are about value and loss Where does this change leave our inherited ideas knowledge and experiences of ice snow frost and frozen ground How will human animal and plant communities superbly adapted to cold and high places cope with less ice or even none at all The ecological services provided by ice are breath taking providing mobility water and food security for hundreds of millions of people around the world often Indigenous and vulnerable communities The stakes could not be higher Drawing on sources ranging from oral testimony to technical scientific expertise this path breaking collection sets out a highly compelling claim for the emerging field of ice humanities convincingly demonstrating that the centrality of ice in human and non human life is now impossible to ignore
