Borovsky, David Gary Sibeck, David Knudsen, Xochitl Blanco-Cano, Katariina Nykyri, 2025-03-19 Multi spacecraft scientific missions for space physics have been flown since the 1960s with early missions such as IMP VELA Helios and ISEE Much of the success in understanding the Earth's magnetosphere and ionosphere and the physics and evolution of the solar wind has come from multi spacecraft measurements Multi spacecraft measurements have been essential for studying the transport of plasma and energy the motion of boundaries the evolution of structure the growth of instabilities particle injections and the rudiments of cross scale coupling and they have allowed accurate determinations of the orientation of plasma boundaries and current sheets the geometry of magnetic field structures the remote connections along magnetic field lines and the direction of plasma wave vectors Multispacecraft missions continue into the present including planned constellation type missions plus the use of the Heliophysics Great Observatory a collection of data from diverse spacecraft throughout the heliosphere Modern four spacecraft volumetric measurements are enabling the measurement of the gradients divergences and curls of the vector fields *People's Diplomacy* Kazushi Minami, 2024-03-15 In *People's Diplomacy* Kazushi Minami shows how the American and Chinese people rebuilt US China relations in the 1970s a pivotal decade bookended by Richard Nixon's 1972 visit to China and 1979 normalization of diplomatic relations Top policymakers in Washington and Beijing drew the blueprint for the new bilateral relationship but the work of building it was left to a host of Americans and Chinese from all walks of life who engaged in people to people exchanges After two decades of estrangement and hostility caused by the Cold War these people dramatically changed the nature of US China relations Americans reimagined China as a country of opportunities irresistible because of its prodigious potential while Chinese reinterpreted the United States as an agent of modernization capable of enriching their country and rejuvenating their lives Drawing on extensive research at two dozen archives in the United States and China *People's Diplomacy* redefines contemporary US China relations as a creation of the American and Chinese people

Ploughshares and Swords Jayita Sarkar, 2022-07-15 India's nuclear program is often misunderstood as an inward looking endeavor of secretive technocrats In *Ploughshares and Swords* Jayita Sarkar challenges this received wisdom narrating a global story of India's nuclear program during its first forty years The book foregrounds the program's civilian and military features by probing its close relationship with the space program Through nuclear and space technologies India

s leaders served the technopolitical aims of economic modernity and the geopolitical goals of deterring adversaries The politically savvy transnationally connected scientists and engineers who steered the program obtained technologies materials and information through a variety of state and nonstate actors from Europe and North America including both superpowers They thus maneuvered around Cold War politics and the choke points of the nonproliferation regime Hyperdiversification increased choices for the leaders of the nuclear program but reduced democratic accountability at home The nuclear program became a consensus enforcing device in the name of the nation Ploughshares and Swords is a provocative new history with global implications It shows how geopolitical and technopolitical visions influence decisions about the nation after decolonization Thanks to generous funding from the Swiss National Science Foundation the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories
