A History of UNESCO Poul Duedahl,2016-04-12 The mission UNESCO as defined just after the end of World War II is to build the defenses of peace in the minds of men In this book historians trace the routes of selected UNESCO mental engineering initiatives from its headquarters in Paris to the member states to assess UNESCO s global impact *The English Professor* Margaret R. O'Leary/Dennis S. O'Leary,2016-02-04 Across the span of more than forty years Raphael Dorman O Leary a professor of English rhetoric and English literature taught his students at the University of Kansas to think straight to put sinew into their sentences and to embrace the magnificent literary treasures of their mother tongue *The English Professor* by authors Margaret R O Leary and Dennis S O Leary offers a narrative of the life work and times of a revered Midwestern university English teacher This memoir narrates how the professor born in 1866 was raised on a Kansas farm in the post bellum era Like his father before him he was committed to a life of learning and teaching His colleagues knew him for his unpretentious exterior honesty and integrity and his flashing anger at cheapness vulgarity pretense and above all charlatanism When Professor O Leary died after a short illness in 1936 his personal effects passed through two generations to his grandson Dennis S O Leary who with his wife Margaret discovered his papers while restoring a family house The trove of material served as the core resource for the compilation of *The English Professor* It provides insights into the histories of Kansas and the University of Kansas and of Harvard University as well as perspectives on higher education including the teaching of English rhetoric language literature journalism and oratory in the United States *At Sea Against the Soviet Fleet* Bryan H. Leese,2025-10-14 *At Sea Against the Soviet Fleet* is a history of the evolution of the United States Navy s Operational Intelligence culture that informs great power competition with China today *At Sea Against the Soviet Fleet* examines the critical transformation of naval intelligence during a pivotal era marked by the Cold War and the Vietnam conflict Bryan Leese meticulously details how U S Navy operational intelligence evolved to meet the complexities of modern naval warfare particularly in response to the increasing threats posed by the Soviet Navy Structured into four main parts this book begins by examining the Vietnam War and the institutionalization of shipboard operational intelligence or what Navy intelligence calls Opintel The book highlights the establishment of Integrated Operational Intelligence Centers as part of the RA 5C Vigilante program and the innovative strategies that emerged in air combat and targeting Leese goes on to underscore the necessity of Opintel to the U S Navy s close and distant blockade strategy in the 1960s and 1970s He delves into the decentralization of intelligence processes emphasizing the importance of adaptability and the need to prevent surprise attacks This evolution is framed within the transition to the Navy s Ocean Surveillance Information System a decentralized and responsive operational intelligence system The ongoing developments of shipboard intelligence capabilities are explored demonstrating how these advancements empowered naval commanders In the 1970s the

organizations evolved as the revolutionary Opintel adaptations of the 1960s that leveraged cooperation without hierarchy became formalized Leese highlights the revolution to evolution process by introducing Opintel support to shipboard tactical decisions to integrate operational intelligence into comprehensive naval strategies Capturing the essence of this transformative period the author discusses the cultural dynamics within the Navy that fostered innovation and interdepartmental collaboration These developments not only contributed to maintaining a strategic edge over the Soviet Union but also laid the groundwork for future naval operations in the digital age Leese s work reveals the intricate interplay between technology strategy and personnel in creating an effective intelligence framework that allows the U S Navy to assert influence at sea setting conditions for sea control in conflict By blending rich archival research with firsthand accounts this book offers a nuanced understanding of how the Navy adapted to an ever changing operational landscape ultimately preserving peace while navigating the complexities of high stakes maritime conflict

human environmental relations since the seventeenth century **Militarizing the Environment** traces the rise of this influential mindset in America and other nations that threatens to supplant ideas of sustainability with demands for adaptation In this extensive historical study of scientific military political and economic formations across five centuries Marzec reveals how environmentality has been instrumental in the development of today s security society informing the creation of the military industrial complex during World War II and the National Security Act that established the CIA during the Cold War Now embedded in contemporary Western thought environmentality has even infiltrated scientific thinking transforming Darwinian insights into a quasi theology that makes security the biological basis of existence Marzec exposes the self destructive nature of this increasingly accepted worldview and offers alternatives that counter the blind alleys of national and global security
