

Joint Venture Accounting (JVA)

Purpose

Companies typically form joint venture partnerships to minimize risks involved in capital intensive operations that demand a long payback period. A joint venture partnership consists of an operating partner (operator) and one or more non-operating partners who combine monetary or personnel resources to share a project's expenses and revenues. The operator manages the venture, arranges venture activities, and maintains accounting records. The operator remits venture expenses, collects revenues, and distributes these to the partners, according to their ownership shares. SAP JVA is a complete accounting system for joint ventures.

Introduction to Joint Venture Accounting (JVA)

Definition

SAP designed JVA for joint venture operations. SAP JVA captures all expenditures and other joint venture transactions by using functions from Financial Accounting (SAP FI), Controlling (SAP CO), Asset Management (SAP AM), Materials Management (SAP MM), Plant Maintenance (SAP PM), and Project System (SAP PS). By working closely with customers and implementation partners, SAP ensures that JVA facilitates smooth management of joint ventures, with great flexibility for growth.

Definition

The primary SAP JVA objects are described in the following table.

Joint Venture	This is an association of two or more partners, formed to share a venture's risks, costs, and revenues. Each partner's share is proportional to their undivided interest in the venture.
Equity Type	The JOA has different development stages, such as engineering and design, construction, and production. Different partners participate at each stage. JVA manages the different stages by using equity types. An equity type explains a particular association of partners. This definition may be related to time, phase or purpose and is linked with a specific equity group.
