The Rhetoric of the Right David L. George, 2013. This study seeks to demonstrate the subtle ways in which changes in the language associated with economic issues are reflective of a gradual but quantifiable conservative ideological shift. In this rigorous analysis, David George uses as his data a century of word usage within The New York Times starting in 1900. It is not always obvious how the changes identified necessarily reflect a stronger prejudice toward laissez faire free market capitalism, and so much of the book seeks to demonstrate the subtle ways in which the changing language indeed carries with it a political message. This analysis is made through exploration of five major areas of focus: economics rhetoric scholarship and the growing behavioral economics school of thought; the discourse of government and taxation; the changing meaning of competition and competitive; changing attitudes toward labor and the celebration of growth relative to the decline in attention to economic justice and social equality.
