Gypsies Josef Koudelka, 2025-09-24 Fifty years after first publication one of the most important photobooks of the 20th century returns offering an intimate glimpse into the daily lives of the Roma community in the 1960s and 1970s Josef Koudelka's Gypsies remains one of his best known series offering a unique survey of the lives of the Roma community across then Czechoslovakia Romania Hungary France and Spain between 1962 and 1971 Originally published in 1975 five years after Koudelka left Prague following the Soviet Union's invasion Gypsies is a classic of documentary photography Now returning in its original hardback format this timely new edition is as much a pioneering photoessay as it is a lesson in book making Carrying only his equipment a rucksack and sleeping bag Koudelka journeyed between different village and encampments His nomadic existence defined by a sense of displacement allowed him to gain the trust of the Roma communities he encountered The resulting series eschews the often derogatory depictions of the community to instead provide unparalleled insight into their world shining a light on their traditions struggles and routines The Roma in these images were photographed mostly in a state that no longer exists ruled by a regime that dissolved in 1989 With such few historical depictions Gypsies is not only a testament to the beauty of photography but a vital historical document of a community often relegated to the shadows Arriving at a moment of contemporary unrest and social marginalization Gypsies is a poignant reminder of the often bleak reality of the disenfranchised and the power of photography to bear witness

Camera Constructs Andrew Higgott, Timothy Wray, 2016-12-05 Photography and architecture have a uniquely powerful resonance architectural form provides the camera with the subject for some of its most compelling imagery while photography profoundly influences how architecture is represented imagined and produced Camera Constructs is the first book to reflect critically on the varied interactions of the different practices by which photographers artists architects theorists and historians engage with the relationship of the camera to architecture the city and the evolution of Modernism The title thus on the one hand opposes the medium of photography and the materiality of construction but on the other can be read as saying that the camera invariably constructs what it depicts the photograph is not a simple representation of an external reality but constructs its own meanings and reconstructs its subjects Twenty three essays by a wide range of historians and theorists are grouped under the themes of Modernism and the Published Photograph Architecture and the City Re imagined Interpretative Constructs and Photography in Design Practices They are preceded by an Introduction that comprehensively outlines the subject and elaborates on the
