In this collection of essays he reviews theories and practices of state intervention as they have developed over two centuries of modern capitalism. He develops an institutionalist approach to the role of the state in economic change and examines the issues involved in particular settings including industrial policy, trade policy, intellectual property rights, regulation and strategies towards transnational corporations. He mounts a sophisticated theoretical and historical case for the continuing essential and constructive roles which the state can and must play in economic development. **Development** Servaas Storm,C. W. M. Naastepad,2001 Globalization is widely regarded as a means not only of ensuring efficiency and growth but also of achieving equity and development for those countries operating in the global economy The book argues that this perception of globalization as the road to development has lost its lustre The experience of the 1990s belied expectation of the gains such as faster growth and reduced poverty which could be achieved through closer integration in the world economy The authors demonstrate that the downside of globalization for developing countries has proved to be far greater than is generally accepted Based on empirical facts and sound economic reasoning they arrive at a non conventional interpretation of the impact of globalisation on the development process of poor countries and propose policy alternatives to the standard Washington consensus On the external front they find that developing countries need to actively manage their integration into the global economy if they are to overcome the imbalances and instabilities associated with international flows of goods and capital and be capable of pursuing broad based and equitable economic development Domestically they show that such development can often be achieved by deviating from rather than adhering to the Washington consensus fiscal and other policy norms The distinguished group of contributors have produced a provocative book which is a substantial contribution to the debate on globalization It will appeal to development economists in particular and economists in general who like to question contemporary economic reasoning      **African Journal of International**
