Life Between Buildings Jan Gehl, 1987-01-01

Life Between Buildings Jan Gehl, 2011 *Life Between Buildings* is Jan Gehl's classic text on the importance of designing urban public space with the fundamental desires of people as guiding principles The book describes essential elements that contribute to people's enjoyment of spaces in the public realm These elements remain remarkably constant even as architectural styles go in and out of fashion and the character of the life between buildings changes

The City at Eye Level Meredith Glaser, 2012 Although rarely explored in academic literature most inhabitants and visitors interact with an urban landscape on a day to day basis is on the street level Storefronts first floor apartments and sidewalks are the most immediate and common experience of a city These plinths are the ground floors that negotiate between inside and outside the public and private spheres *The City at Eye Level* qualitatively evaluates plinths by exploring specific examples from all over the world Over twenty five experts investigate the design land use and road and foot traffic in rigorously researched essays case studies and interviews These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design but also the concerns of urban communities The editors have put together a comprehensive guide for anyone concerned with improving or building plinths including planners building owners property and shop managers designers and architects

How to Study Public Life Jan Gehl, Birgitte Svarre, 2013-12-04 How do we accommodate a growing urban population in a way that is sustainable equitable and inviting This question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance Jan Gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people But given the unpredictable complex and ephemeral nature of life in cities how can we best design public infrastructure vital to cities for getting from place to place or staying in place for human use Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space In *How to Study Public Life* Jan Gehl and Birgitte Svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension This type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems Studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks The

original goal is still the goal today to recapture city life as an important planning dimension Anyone interested in improving city life will find inspiration tools and examples in this invaluable guide **Life between buildings; using public space** J. Gehl,1987 **The Affective Agency of Public Space** Asma Mehan,2024-09-23 The Affective Agency of Public Space

explores the pivotal role that public spaces play in fostering social inclusion and community cohesion within various settings including Europe and the United States This scholarly work underscores the critical importance of developing inclusive public zones that enhance urban life and promote integration and interaction among diverse community groups It also confronts and debunks common myths about different people actively addressing misconceptions while promoting the recognition of diverse identities and voices Through a comparative lens the book presents insightful case studies that illustrate its core themes Serving as a timely and important academic resource this text is indispensable for urban planners educators architects designers and sociologists committed to progressive urban planning methodologies **Architecture, Space and Memory of Resurrection in Northern Ireland** Mohamed Gamal Abdelmonem,Gehan Selim,2019-04-25

Northern Ireland has a complex urbanism with multilayered socio spatial politics In this environment issues of communication self representation and expression of identity are central to the experience of urban space and architecture where the dichotomy of division and shared living are spatially exercised in everyday life Unlike other studies in the area this book focuses on the everyday experiences of local communities in both public and private spheres issues of shareness challenging conventional approaches to divided cities The book aims to layer its narratives of architectural and social developments as an urban experience in post conflict settings over the past two decades **Introduction to Space Syntax in Urban Studies** Akkelies van Nes,Claudia Yamu,2021-07-31 This open access textbook is a comprehensive introduction to space syntax method and theory for graduate students and researchers It provides a step by step approach for its application in urban planning and design This textbook aims to increase the accessibility of the space syntax method for the first time to all graduate students and researchers who are dealing with the built environment such as those in the field of architecture urban design and planning urban sociology urban geography archaeology road engineering and environmental psychology Taking a didactical approach the authors have structured each chapter to explain key concepts and show practical examples followed by underlying theory and provided exercises to facilitate learning in each chapter The textbook gradually eases the reader into the fundamental concepts and leads them towards complex theories and applications In summary the general competencies gain after reading this book are to understand explain and discuss space syntax as a method and theory be capable of undertaking various space syntax analyses such as axial analysis segment analysis point depth analysis or visibility analysis be able to apply space syntax for urban research and design practice be able to interpret and evaluate space syntax analysis results and embed these in a wider context be capable of producing new original work using space syntax This holistic textbook functions as compulsory literature for spatial analysis courses where space syntax is part of the methods

taught Likewise this space syntax book is useful for graduate students and researchers who want to do self study Furthermore the book provides readers with the fundamental knowledge to understand and critically reflect on existing literature using space syntax

Cities for People Jan Gehl, 2013-03-05 For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use or could use the spaces where they live and work In this revolutionary book Gehl presents his latest work creating or recreating cityscapes on a human scale He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be cities for people Taking into account changing demographics and changing lifestyles Gehl emphasizes four human issues that he sees as essential to successful city planning He explains how to develop cities that are Lively Safe Sustainable and Healthy Focusing on these issues leads Gehl to think of even the largest city on a very small scale For Gehl the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train This small scale view he argues is too frequently neglected in contemporary projects In a final chapter

Gehl makes a plea for city planning on a human scale in the fast growing cities of developing countries A Toolbox presenting key principles overviews of methods and keyword lists concludes the book The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe

Parking Spaces Mark C.
