 in the Construction Industry** George Ofori,Shamas-ur-Rehman Toor,2021-03-07 This book presents a new framework for
 leadership in the construction industry which draws from the authentic leadership construct The framework has three major
 themes self leadership self transcendent leadership and sustainable leadership Despite its significance leadership has not
 been given due importance in the construction industry as focus is placed on managerial functionalism At the project level
 even with the technological advances in the industry in recent years construction is realized in the form of people
 undertaking distinct interdependent activities which require effective leadership The industry faces many challenges
 including demanding client requirements and project parameters more stringent regulations codes and systems intense
 competition in the industry and threats from disruptive enterprise In such a complex environment technology driven and tool
 based project and corporate management is insufficient It must be complemented by a strategic genuine stakeholder focused
 and ethical leadership Leadership in the Construction Industry is based on a study on authentic leadership and its
 development in Singapore Leadership theories and concepts are reviewed the importance of leadership in the construction
 industry is discussed and the grounded theory approach which was applied in the study is explained Many eminent
 construction professionals in Singapore were interviewed in the field study Emerging from the experiences of the leaders
 documented in this book are three major themes 1 self leadership how leaders engage in various self related processes such
 as self awareness self regulation and role modeling 2 self transcendent leadership how leaders go beyond leading themselves
 to leading others through servant leadership shared leadership spiritual leadership and socially responsible leadership and

finally 3 sustainable leadership or the strategies leaders employ to make the impact of their leadership lasting A synthesis of these themes and their implications for leadership development is presented before the book concludes with some recommendations for current and aspiring leaders about how they can engage with them This book is essential reading for all construction practitioners from all backgrounds and researchers on leadership and management in construction
