Numerical Methods in Geotechnical Engineering Thomas Benz,Steinar Nordal,2010-05-25 Numerical Methods in Geotechnical Engineering contains 153 scientific papers presented at the 7th European Conference on Numerical Methods in Geotechnical Engineering NUMGE 2010 held at Norwegian University of Science and Technology NTNU in Trondheim Norway 2 4 June 2010 The contributions cover topics from emerging research to engineering pra **Nonlinear Optimization of Vehicle Safety Structures** Jesper Christensen,Christophe Bastien,2015-12-07 Nonlinear Optimization of Vehicle Safety Structures Modeling of Structures Subjected to Large Deformations provides a cutting edge overview of the latest optimization methods for vehicle structural design The book focuses on large deformation structural optimization algorithms and applications covering the basic principles of modern day topology optimization and comparing the benefits and flaws of different algorithms in use The complications of non linear optimization are highlighted along with the shortcomings of recently proposed algorithms Using industry relevant case studies users will how optimization software can be used to address challenging vehicle safety structure problems and how to explore the limitations of the approaches given The authors draw on research work with the likes of MIRA Jaguar Land Rover and Tata Motors European Technology Centre as part of multi million pound European funded research projects emphasizing the industry applications of recent advances The book is intended for crash engineers restraints system engineers and vehicle dynamics engineers as well as other mechanical automotive and aerospace engineers researchers and students with a structural focus Focuses on non linear large deformation structural optimization problems relating to vehicle safety Discusses the limitations of different algorithms in use and offers guidance on best practice approaches through the use of relevant case studies Author s present research from the cutting edge of the industry including research from leading European automotive companies and organizations Uses industry relevant case studies allowing users to understand how optimization software can be used to address challenging vehicle safety structure problems and how to explore the limitations of the approaches given Public Roads,2007 **Innovations in Impact and Blast Protections** Yonghui Wang,Xudong Zhi,Ximei Zhai,jiachuan Yan,Rong Zhang,2022-08-23 This book develops several novel foam filled structures and steel concrete steel SCS sandwich structures which provides more alternatives for ensuring the safety of buildings and infrastructures under extreme loading like impact and blast In the first part of this book the aluminium foam and polyurethane foam filled structures have been developed for dissipating impact and blast energy Experimental and numerical studies have been conducted to obtain their behaviours under impact loading In addition analytical models have also been proposed to assess their energy absorption performances and facilitate the impact and blast design when using the proposed foam filled structures In the second part of this book SCS sandwich structures with novel shear connectors have been developed and their behaviours under impact and blast loading have been experimentally numerically and analytical studied Analytical models for predicting the impact and blast responses

of SCS sandwich structures have also been developed In the third part of this book a new steel polyurethane foam steel concrete steel SPUFSCS panel i e the combination of foam material and SCS panel has been developed to achieve a higher impact resistant capacity Owing to the increasing impact and blast threats on buildings and infrastructures the studies presented in this book are of significant importance for providing several new solutions for impact and blast enhancement

Mechanical Engineering, Materials and Energy III Mohd Zulkifly Abdullah,2013-12-19 Selected peer reviewed papers from the 2013 3rd International Conference on Mechanical Engineering Materials and Energy ICMEME 2013 November 9 10 2013 Changsha China *Concrete Structures Subjected to Impact and Blast Loadings and Their Combinations* Chunwei Zhang,Gholamreza Gholipour,2022-05-08 Although much research focuses on investigating the responses of reinforced concrete RC structures under sole impact or blast loads the responses of RC structures under a combination of impact and blast loads currently represent a gap in our knowledge The combined actions of impact and blast loadings may be applied to RC structures during accidental or intentional collision of vessels vehicles etc carrying explosive materials A comprehensive study on the vulnerability of various structural members is carried out using finite element FE simulations under combination of impact and blast loads with the variations of various loading and structural related parameters and key parameters This book introduces various structural analysis approaches for concrete structures when subjected to extreme loads such as impact and blast loadings The theory of the combinations of impact and blast loads is proposed that can provide primary insights to the specific readers to develop new ideas in impact and blast engineering including combined actions of extreme loads arising from real world intentional or accidental events This book will be of value to students undergraduate or postgraduate engineers and researchers in structural and civil engineering and specifically those who are studying and investigating the performances of concrete structures under extreme loads
