Luxury Marketing Klaus-Peter Wiedmann,Nadine Hennigs,2012-11-10 The luxury market has transformed from its traditional conspicuous consumption model to a new experiential luxury sensibility that is marked by a change in how consumers define luxury In a global context it is crucial to understand why consumers buy luxury what they believe luxury is and how their perception of luxury value impacts their buying behavior This handbook aims to provide a holistic approach to luxury marketing with respect to the characteristics and the key challenges and opportunities of luxury brand management Therefore the multifaceted contributions by authors from different parts of the world will offer both a research and management perspective of luxury marketing and deliver a concentrated body of knowledge with contributions from diverse elements

Is the Environment a Luxury? Silvia Tiezzi,Chiara Martini,2014-07-11 The purpose of this collection of essays is to shed some light on the complex relationship between environmental quality and the distribution of income Are the preferences of the poor towards a cleaner environment really different from those of the rich Environmental economists have traditionally focused on efficiency issues In their analyses the quality of the environment is usually related to aggregate or average variables like per capita income policy recommendations are usually formulated considering efficiency with no regard for equity and also the predicted effects of policies are evaluated in aggregate terms The essays collected in this volume go into the problem of the relationship between environmental quality and income distribution The book s opening essay shows how different theories of economic growth and environmental quality seem to suggest that the higher the level of income the higher is the value of environmental protection The essays that follow a mix of already published papers and of papers solicited for this book analyse the relationship between environmental quality and income distribution from different perspectives both micro and macro and on the basis of more than one methodology This book highlights that the preferences of the poor towards a cleaner environment may differ from those of the rich but income is also very likely to represent only one factor affecting them The essays consider other relevant factors affecting preferences for environmental quality What clearly emerges is that the distribution of costs and benefits of environmental policies is the key for their successful implementation and that further research is needed to both address the distributional effects themselves and the strategies to mitigate them
