Human Resource Management 'with Chinese Characteristics' Malcolm Warner, 2013-09-13

Five years into World Trade Organization membership, how is China's system of people management adapting to the changing world? This edited book provides an up-to-date state-of-the-art overview of current theory and practice of human resource management with Chinese characteristics. The latter is a phrase used to refer to the specific cultural, institutional, and social setting in which such management structures and processes are to be found in the Middle Kingdom. As the People's Republic of China becomes inexorably linked to the international economy and increasingly faces the challenges of globalization, its enterprises and their managers have to adapt to pressures to conform to external human resources and employment norms whilst at the same time conforming to internal labour laws and socio-political demands. The tension between these two sets of factors provides an arena in which human resource managers as well as workers have to cope, perform, and survive. The papers included in this collection are all based on empirical on-site research by specialists in the field. They deal with such HRM-related topics as expatriates, family demands, human capital, joint ventures, labour disputes, organizational commitment, psychological contracts, social networks, work behaviour, and the like. The authors of the papers covered in the book come from a variety of backgrounds and university affiliations in Australia, Canada, Finland, Hong Kong, Japan, People's Republic of China, United Kingdom, and United States of America.

This symposium explores Chinese people management as an academic subject, looking at where it is currently going and the likely direction of its progress. After the economic reforms introduced by Deng Xiaoping in 1978, China saw the introduction of Human Resource Management (HRM). This book discusses the specific issues which are relevant to its evolution in China, in particular whether there is a dominant paradigm in the field and whether there might be a new one in the making. It looks at the possibility of a theory of Chinese management or Chinese theory of management. This comprehensive volume covers a wide range of topics including charismatic leadership, employee commitment, creativity, guanxi, job security, knowledge generation, mentorship, national identity, and organizational innovation, all in the context of Chinese HRM. The contributors are experts in their respective fields of management, organizational behaviour, psychology, sociology, and related disciplines, and cover a wide range of themes, models, and specialisms. This book was originally published as a special issue of *The International Journal of Human Resource Management*.

Chinese Management in the 'Harmonious Society' Malcolm Warner, Chris Rowley, 2013-10-18 Whither Chinese management The Middle Kingdom has come a long way since the economic reforms were introduced after 1978 As ownership has opened up and has become more fragmented the state owned firms no longer dominate the scene nor does their management model Managing has also become more complex and diversified as well as more professional This book asks what the next steps are likely to be and will assess the current directions in which Chinese managers are developing as its economy slows down in the face of global uncertainty It aims to update previous works in the field covering business and management in these countries It covers a wide range of topics including banking competition employee satisfaction expatriates industrial relations HRM organization SMEs social responsibility strategic sourcing trust

and so on The book also asks in which future directions management may be moving in this important part of the international economy The authors are all experts in their fields and are all based in universities and business schools in countries such as Australia and the UK among others The work is aimed at undergraduate and postgraduate students in business administration especially those on MBA programmes as well as those studying development economics management studies and related courses including lecturers in those subjects This book was published as a special issue of Asia Pacific Business Review

Society and HRM in China Malcolm Warner, 2013-09-13 This volume looks at the relationship between society and human resource management HRM in China In doing so it asks how representative the latter is of the former The contributors argue that there needs to be a minimum degree of consonance between these two variables if HRM is to be sufficiently underpinned by social reality It is only in a wider framework that people management in general and in China in particular can be fully understood whether through theory or through practice Society and HRM in China explores the changes in Chinese society over the last century and then goes on to analyse how these changes have shaped China's HRM Arguably HRM did not emerge from the void it was shaped by the societal culture from which it sprung and the economic forces influencing its institutions and organizations However there is very little academic literature about the relationship between contemporary Chinese society and its HRM which isn't extremely specific As such much of the research in this collection is not only relatively representative but also highly cross sectional The contributions are all drawn from experts in the field across the disciplines hailing from a diverse range of national origins and educational institutions They cover a wide range of topics approaches and emphases This book was originally published as a special issue of The International Journal of Human Resource Management
