Globalization Development and Social Justice Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies Globalization and Development Volume I Shigeru Otsubo, 2015 Globalization and Development Facts and Leading Issues is the first volume of a cross national study on the interstate dispersion of the impact growth inequality and poverty that international economic integration provides to the economies of the developing countries along with some specific factors that determine the outcome in each nation such as socio economic institutions and policy packages The book looks at the ongoing process of globalization which has involved three major currents of political economic and cultural integration *Perspective on Globalisation and Africa Development* Olu-Olu Olufayo, 2005 Development & Growth: Economic Impacts of Globalization Farhang Morady, Hakan Kapucu, Ömer Yalçınkaya, 2017-04-14 The growth paradigm or the economic growth generally been presented as a positive limitless and good for social problems The term was hardly touched in pre capitalism by any academic research With the rise of capitalism and industrial revolution it became an important tool to measure production quantitatively and qualitatively Industrialisation also encouraged the expansion of trade and gradual breakdown of the pre capitalist order in 18th century in Britain The spread of market had facilitated the specialisation encouraging division of

labour Whilst for The Classical Political Economists Adam Smith David Ricardo and Thomas Malthus economic growth is self reinforcing Marx pointed out importance of forces and relations of production and significance of social classes within it Marx 1863 Smith Ricardo and Malthus were writing at a time when capitalist development was expanding fast and growth was a central in the process The gradual impact of the West on the rest of world became part of a wider process of change in the World Economy European capital increased its domination of the world trade through expansionist commercial policies Wallerstein 1979 The economic growth encouraged commerce The necessity to export and other technological changes formed part of the reason for the decline of feudalism This transition from feudalism to capitalism began in the West and soon made an impact on the rest of the World T Farhang Morady Hakan Kapucu mer Yal nkaya Development GDP treats resources as income without excluding depletion or depression of the resources Moreover GDP has been criticised for disregarding income distribution Despite all the criticism GDP has been the most significant indicator of growth and development With the Post War II reconstruction of devastated countries and in order to kick start the World Economy the state in both developed and developing counties became the important agency to facilitate economic growth The establishment of the Bretton Woods institutions the Keynesian model of government intervention and the US implementation of New Deal facilitated growth This was deliberate strategy to reconstruct and create networks of international cooperation This was pointed out by President Truman in 1949 A program of development based on the concepts of democratic fair dealing All countries including our own will greatly benefit from a constructive program for the better use of the World s human and natural resources Truman 1949 This meant the reinforcement and need to distribute the Benefits of capitalist form of development more widely against the planned economy sustained by the Soviet Union The economist such as Joseph Schumpeter pointed to the possibility that capitalist growth if it is sustained could abolish poverty Schumpeter 1954 pp66 68 Whilst development meant rapid industrialisation GDP became a key policy objective for the policy makers and governments around the world not just in the Soviet Union but the Western Capitalist World to set targets for their Growth Rate The end of the Cold War in the 1980s for some meant triumph of Neoliberal Capitalism The others talked of trade liberalization free movement of capital and the development of information technology facilitating the relocation of businesses across the world Ohmae 1995 Friedman suggested that globalization is the Inevitable Integration of markets nation states and technologies enabling individuals corporations and nation states to reach around the world farther faster deeper and cheaper than ever before Friedman 1999 Development China India and Brazil helped the world economy to grow at least for now However the unevenness of the world economy continues to cause difficulties especially the US as they feeling the threat of their competitors such as China Germany and even India The victory of Donald Trump as the S President has represented an ideological shift from free trade advocator of global capitalism to a mixture of right wing populism Before and after the presidential election he called for the revival of the American economy which has been under considerable pressure since

2008 World Recession In order to prove growth rate Trump has a huge challenge ahead not least to deal with the competition from South East Asian economies especially China It remains to be seen whether the new US administration will continue with their populist rhetoric In this book Economic Impacts of Globalization Growth Development several academicians provide different analysis of economic growth and economic development The scientific ethics and responsibility of the works in the book belong to the authors writers The book comprises of 15 chapters focusing on economic growth and economic development in the era of globalisation By taking different angles they demonstrate different problems and solutions

Globalization and Economic Development Servaas Storm,C. W. M. Naastepad,2001 Globalization is widely regarded as a means not only of ensuring efficiency and growth but also of achieving equity and development for those countries operating in the global economy The book argues that this perception of globalization as the road to development has lost its lustre The experience of the 1990s belied expectation of the gains such as faster growth and reduced poverty which could be achieved through closer integration in the world economy The authors demonstrate that the downside of globalization for developing countries has proved to be far greater than is generally accepted Based on empirical facts and sound economic reasoning they arrive at a non conventional interpretation of the impact of globalisation on the development process of poor countries and propose policy alternatives to the standard Washington consensus On the external front they find that developing countries need to actively manage their integration into the global economy if they are to overcome the imbalances and instabilities associated with international flows of goods and capital and be capable of pursuing broad based and equitable economic development Domestically they show that such development can often be achieved by deviating from rather than adhering to the Washington consensus fiscal and other policy norms The distinguished group of contributors have produced a provocative book which is a substantial contribution to the debate on globalization It will appeal to development economists in particular and economists in general who like to question contemporary economic reasoning
