The Quest for Autonomy in Acadia André Magord, 2008 Acadians remain one of the few North American historical minorities which has been able to survive as a distinct ethno cultural and linguistic group This fact is all the more striking since this people suffered a deportation and dispersion and it does not possess its own territory nor does it have a government of its own Acadians therefore have continually had to face the issue of autonomy in all its varied forms The central issue addressed by this book is an inquiry into the nature of the process which has maintained the unique Acadian minority in existence right up to the present day This study differs from other multidisciplinary analyses of this community principally because it studies the historical continuity of the dynamic of autonomy that has evolved since the beginning of Acadia The research for this complete chronological framework encompasses a number of intersecting disciplinary approaches at the historical political socio cultural and existential levels These differing perspectives are harmonized by their common objective of defining the process of autonomization and the counter process of heteronomization which lie at the heart of each of the periods studied These approaches allow critical openings between the framework of social history power relationships and the fundamental aspirations of the minority

Childrens Agency and Development in African Societies Yaw Ofosu-Kus, 2017-07-19 This book focuses on African childhood and youth within the context of development and socialization where children are expected to be moulded in the image of adults In many African societies children are generally held as passive bearers of the demands of adults regardless of the fact that they are often exposed to a multitude of challenges that originate from the capriciousness of those adults However buoyed by international conventions and national legislations that offer them greater protection and the ubiquitous internet that exposes them to childhood and youth experiences elsewhere many of them are increasingly becoming assertive in homes schools and communities as well as re invigorating their survival and self preservation instincts It is in this regard that this book through the various chapters engages with their competencies skills and creativity to respond to experiential challenges as independent migrants or ones under coercion working in city streets and markets or cocoa farms or juggling work and schooling in pursuit of some education Confronted with their parents and siblings health predicaments and the inadequacies of state and familial care or urgent negotiation of their sexualities they demonstrate incredible resilience Similarly their perceptiveness is demonstrated in a unique appreciation of politics and its actors and a capacity to assume responsibilities beyond their chronological age Thus while highlighting some of the challenges confronting African children the book provides gripping evidence of how they resiliently negotiate those challenges

Religion et violence comme langage de contre-hégémonie Edmond Mokuinema Bomfié, 2016-03-15 Le présent ouvrage porte sur le rapport millénaire entre la religion la politique l'idéologie et la violence variables normalement répressives au regard des principes de la cité et de libéralisme Mais au vu du regain du radicalisme religieux de par le monde aujourd'hui la violence non rituelle soulève l'interrogation Un autre thème repris en examen celui de la sécurité humaine est ici d'actualité La sociologie de la religion pose des passerelles videntes avec la sociologie de la violence et avec la géopolitique des religions
