A Technical Dictionary, 1895 **The Memory of Tiresias** Mikhail Iampolski, 1998-10-26 The concept of intertextuality has proven of inestimable value in recent attempts to understand the nature of literature and its relation to other systems of cultural meaning In *The Memory of Tiresias* Mikhail Iampolski presents the first sustained attempt to develop a theory of cinematic intertextuality Building on the insights of semiotics and contemporary film theory Iampolski defines cinema as a chain of transparent mimetic fragments intermixed with quotations he calls textual anomalies These challenge the normalization of meaning and seek to open reading out onto the unlimited field of cultural history which is understood in texts as a semiotically active extract already inscribed Quotations obstruct mimesis and are consequently transformed in the process of semiosis an operation that Iampolski defines as reading in an aura of enigma In a series of brilliant analyses of films by D W Griffith Sergei Eisenstein and Luis Buñuel he presents different strategies of intertextual reading in their work His book suggests the continuing centrality of semiotic analysis and is certain to interest film historians and theorists as well as readers in cultural and literary studies *Technical Manual* United States.
