4. Formulate the content of the text yourself!  
Use all gap words!

In the 18th century, the Industrial Revolution began in \_\_\_\_\_, changing the way people lived and worked. Before this period, most goods were made by \_\_\_\_\_ in small workshops or at home. However, the invention of machines led to the rise of \_\_\_\_\_, where goods could be produced on a large scale. These factories needed a lot of workers, so people moved from the \_\_\_\_\_ to cities in search of jobs, leading to urbanization. This shift not only changed the economy but also had a profound impact on \_\_\_\_\_ and culture.

Life in the factories was tough. Workers, including \_\_\_\_\_, often worked long hours in dangerous conditions for low pay. Despite the hardships, the factory system paved the way for mass \_\_\_\_\_, making goods cheaper and more accessible to a wider range of people. This period also saw significant advancements in \_\_\_\_\_, such as the steam engine, which further boosted factory efficiency and production capabilities.

The rise of factories also influenced the \_\_\_\_\_. Literature, paintings, and music began to reflect the realities of the new industrial landscape, sometimes criticizing the social injustices and celebrating human resilience and innovation. Notably, the Industrial Revolution led to the creation of a new social class, the \_\_\_\_\_ middle class, which played a crucial role in shaping modern economic and political \_\_\_\_\_.

Factories and the Industrial Revolution had a lasting impact on the world, setting the stage for modern \_\_\_\_\_ economies. While they brought about economic growth and technological progress, they also led to environmental \_\_\_\_\_ and social inequalities that are still relevant today. The legacy of factories is a testament to human ingenuity and the complex relationship between progress and its costs on society and the \_\_\_\_\_.
