Finin, Steven Willmott, 2006-03-30 There is a growing interest in the use of ontologies for multi agent system app cations On the one hand the agent paradigm is successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful tool to enable kno edge sharing and a growing number of applications have bene ted from the use of ontologies as a means to achieve semantic interoperability among heterogeneous distributed systems In principle ontologies and agents are a match made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately depends on und standing the goals preferences and constraints posed by the user Autonomy is theabilitytoperformataskwithlittleornouserintervention whileproactiveness involves acting autonomously with no need for user prompting Communication but also autonomy and proactiveness depend on knowledge The ability to c municate depends on understanding the syntax terms and structure and the semantics of a language Ontologies provide the terms used to describe a domain and the semantics associated with them In addition ontologies are often comp mented by some logical rules that constrain the meaning assigned to the terms These constraints are represented by inference rules that can be used by agents to perform the reasoning on which autonomy and

proactiveness are based *What They Didn't Tell You about Project Management* Robin Francis Vysma, 2014 Take a journey through the world of projects If you ve learned about project management in the classroom then the real world of projects is going to be quite an eye opener There will be monsters against which you are defenceless There will be seemingly insurmountable obstacles and your career will hinge on your capacity to deliver in this environment So what s wrong with the way we teach project management now How should it be taught What are we doing wrong The dollars at stake are in the scale of the national debt It s time to start looking at project management from a different angle
