Handbook of Psychological Assessment Gerald Goldstein, Michel Hersen, 2000-02-16 The field of psychological assessment has been undergoing rapid change The second edition of this Handbook published in 1990 appeared at the beginning of a decade marked by extensive advances in assessment in essentially all of its specialized areas There are many new tests new applications of established tests and new test systems Major revisions have appeared of established tests notably the Wechsler intelligence scales The time seemed right for a third edition since even over the relatively brief period of ten years many tests described in the second edition have been replaced and are no longer commonly used Furthermore much new research in such areas as neuropsychology cognitive science and psychopathology have made major impacts on how many tests and other assessment procedures are used and interpreted This third edition represents an effort to give the reader an overview of the many new developments in assessment while still maintaining material on basic psychometric concepts in order for it to continue to serve as a comprehensive handbook for the student and professional

Assessing Adolescent and Adult Intelligence Alan S. Kaufman, Elizabeth O. Lichtenberger, 2005-08-05 The classic text now updated with a new interpretive approach to the WAIS III Assessing Adolescent and Adult Intelligence the classic text from Alan Kaufman and Elizabeth Lichtenberger has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS III Augmenting the traditional sequential and simultaneous WAIS III interpretive methods the authors present a new approach derived from Cattell Horn Carroll CHC theory This approach combines normative assessment performance relative to age peers with ipsative assessment performance relative to the person's own mean level Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC IV Kaufman and Lichtenberger have applied this system to the WAIS III profile of scores along with integrating recent WAIS III literature Four appendices present the new method in depth In addition to a detailed description the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the

new system and norms tables for the new WAIS III subtest combinations added in this approach. Assessing Adolescent and Adult Intelligence remains the premier resource for the field covering not only the WAIS III but also the WJ III, the KAIT and several brief measures of intelligence as well as laying out a relevant up to date discussion of the discipline. The new theory based interpretive approach for the WAIS III makes this a vital resource for practicing psychologists as well as a comprehensive text for graduate students.
