Journal Psychiatry Child:

Journal of Child Psychology and Psychiatry and Allied Disciplines (majalah). Association for Child Psychology and Psychiatry, 1968 Rutter's Child and Adolescent Psychiatry Sir Michael J. Rutter, Dorothy Bishop, Daniel S. Pine, Stephen Scott, Jim S. Stevenson, Eric A. Taylor, Anita Thapar, 2011-08-24 Rutter's Child and Adolescent Psychiatry has become an established and accepted textbook of child psychiatry. Now completely revised and updated, the fifth edition provides a coherent appraisal of the current state of the field to help trainee and practising clinicians in their daily work. It is distinctive in being both interdisciplinary and international in its integration of science and clinical practice and in its practical discussion of how researchers and practitioners need to think about conflicting or uncertain findings. This new edition now offers an entirely new section on conceptual approaches and several new chapters including neurochemistry and basic pharmacology, brain imaging, health economics, psychopathology in refugees and asylum seekers, bipolar disorder, attachment disorders, statistical methods for clinicians. This leading textbook provides an accurate and comprehensive account of current knowledge through the integration of empirical findings with clinical experience and practice and is essential reading for professionals working in the field of child and adolescent mental health and clinicians working in general practice and community pediatric settings.

Integrating science and clinical practice, it is a comprehensive reference for all aspects of child and adolescent psychiatry. New to this full color edition are expanded coverage on classification including the newly revised Diagnostic and Statistical Manual of Mental Disorders DSM 5 and new chapters on systems neuroscience, relationship based treatments, resilience, global psychiatry and infant mental health. From an international team of expert editors and contributors, this sixth edition is essential reading for all professionals working and learning in the fields of child and adolescent mental health and developmental psychopathology as well as for clinicians working in primary care and pediatric settings. Michael Rutter has contributed a number of new chapters and a Foreword for this edition. I greatly welcome this new edition as providing both a continuity with the past and a substantial new look.

Professor Sir Michael Rutter extract from Foreword: Reviews of previous editions. This book is by far the best textbook of Child Adolescent Psychiatry written to date. Dr Judith Rapoport, NIH. The editors and the authors are to be congratulated for providing us with such a high standard for a textbook on modern child psychiatry. I strongly recommend this book to every child psychiatrist who wants a reliable up to date comprehensive, informative and very useful textbook. To my mind, this is the best book of its kind available today.
