Crane Safety on Construction Sites Task Committee on Crane Safety on Construction Sites, 1998-01-01 Crane Safety on Construction Sites ASCE Manuals and Reports on Engineering Practice No 93 was written to aid the construction industry in the management of crane operations Crane operations in construction range from unloading and setting equipment on a one time basis to using numerous cranes that perform multiple tasks on larger complex projects This manual addresses these variables by clearly defining and assigning crane management responsibilities It discusses issues such as safety plans responsibilities supervision and management operations training manufacture crane safety devices and regulations in some detail as they relate to crane management Appendixes are provided that list additional resources manufacturers of crane safety devices and explore case studies of crane accidents South African Mining, Coal, Gold & Base Minerals ,1997-07

## **Development of a Methodology for the Systematic Evaluation of Value Creation in Construction Execution**

Hendrik Jonitz, 2025-10-10 In this work a structured methodology and a vector based process indicator are developed to evaluate value creation within production processes on construction sites For empirical evaluation Hendrik Jonitz conducts extensive field experiments on two different construction sites as well as within a precast concrete plant In this context positional data for materials and personnel as well as operational data from construction cranes are used for the value creation analysis of 64 precast assembly processes and 54 intralogistics processes The results form a comprehensive knowledge base on value creation in the context of production processes on construction sites and thus provide practical and research relevant starting points for the optimization of these processes
