Owner's Manual

Introduction

Thank you for choosing this JENSEN Universal Remote Control. The new JENSEN line of universal remotes has been designed with the consumer in mind. Months of market research and focus groups helped develop an ergonomically correct remote control with all the latest features and benefits to enhance your viewing experience.

Before you begin using your new JENSEN remote control, you must first read the instructions carefully and install a set of two "AA" batteries (not included). This manual was written for use with the JR300, JR400, and JR500. Please note that not all modes will be available in all models.

Installing The Batteries:

1. Locate the battery cover on the back of the remote control.
2. Pull down the lever on the battery door to open battery compartment.
3. Install two "AA" batteries, making sure that the "+" and "-" marks on the batteries match the diagram inside the battery compartment.
4. A battery test can be performed by pressing any of the **"mode keys"**: TV, VCR, CBL/SAT/ANT, Cable/Satellite/Antenna, DVD, and Audio. The red LED indicator will blink once.

Note: Your JENSEN Universal Remote Control has a built-in memory backup that allows you to remove the batteries for up to 10 minutes without losing programmed information. If you wait longer than 10 minutes to replace the batteries, you may have to reprogram your universal codes.

Programming the Remote Control:

There are two methods available to program your new remote control. The first method is "Manual Programming," the second method is "Standard Step-and-Set." Please choose which of the following best fits your needs.

Manual Programming:

Locate the four-digit codes for your device and brand in the code listing included with this manual. You will notice that there will be more than one four-digit code for some devices next to some brands. This is the result of many manufacturers using different codes for different models. Once you have located the codes that you will be using, you are ready to start programming your remote. Please follow the steps below for best results.

1. Manually turn on the device that you are trying to set up (TV, VCR, Cable/Satellite/Antenna, DVD, or Audio).
2. Press down and release the device **"mode key"** (TV, VCR, CBL/SAT/ANT, DVD, or AUDIO) on the remote control. The red LED indicator will blink once.
3. Press down and hold the **SETUP** key until the red LED indicator blinks twice, then release.
4. Enter the first four-digit code for the device you are trying to program. The LED will blink once on each digit entry except for the last digit, where it will blink twice to confirm that a valid code has been programmed.
5. Aim the remote control at the device that you programmed and press **POWER**. If the device turns off, you have programmed the correct code. If the device does not turn off, return to step 2 and use the next four-digit code for that brand and model. **provided by www.replacementremotes.com**
6. Repeat the steps above to program the next device.
 - If any other key is pressed besides a digit key during programming, the unit will display one long blink, exit programming state, and restore the last preprogrammed code.
 - Upon entry of an invalid key sequence or invalid code, the remote control will display one long blink and return to the last preprogrammed code.
 - The unit will exit programming state and return to the last preprogrammed code if 10 seconds have elapsed between digit entries.

Standard Step-and-Set Programming:

If the device code for a particular brand is unknown, you will be able to cycle the remote through the available codes for that device mode and sample functions from each code in order to find the code that operates the desired device. The keys which are available to be sampled (provided they are applicable to that model) are: 0, 1, 2, 3, POWER, CHANNEL UP, VOLUME UP, PLAY and STOP. Invalid key presses will be ignored while in the programming state. Follow the steps below to cycle through each available device code and sample its functions.

1. Manually turn on the device that you are trying to set up (TV, VCR, Cable/Satellite/Antenna, DVD, or Audio).
2. Press down and release the device **"mode key"** (TV, VCR, CBL/SAT/ANT, DVD, or AUDIO) on the remote control. The red LED indicator will blink once.
3. Press down and hold the **SETUP** key until the red LED indicator blinks twice, then release.
4. Enter the digits **9, 9, 1**. The red LED will blink twice. Press the first function you want to test, i.e., **POWER**. **key** again to go to the next code in the library. Repeat the procedure above until locating the correct code or until you have gone through the entire code library.
5. When the correct code has been located, press **SETUP** and release. The red LED will blink twice, locking in the code for that device.
6. Repeat the steps above to program the next device.

Note: The available functions within a code may be sampled as many times as desired until advancing to the next code by pressing a specific device mode key. For the selected mode, the search will begin with the first code in the library and cycle through the code is currently programmed or will begin with the current programmed code. The search function has an end of cycle designator (LED will blink three times) to indicate when a cycle has been completed. The unit will begin to cycle through the available codes again. The LED will light each time a function is sent. If no key is pressed within 10 seconds, the remote will exit the setup mode and return to the code previously set up before Step-and-Set was initiated. The unit will blink two times after successful completion of the programming sequence.

- Upon entry of an invalid key sequence, the LED will display one long blink and return to normal operation.
- The unit will exit programming state and return to normal operation if 10 seconds have elapsed between key presses.

Code Verification:

To find the four-digit device code that you have programmed in the remote, follow the procedure outlined below. This is used to get feedback on the device code selected. The number of blinks that occur after pressing the numeric keys 1, 2, 3 and 4 represents the 4-digit 10 code set up for that mode. There is a 0.5-second delay between each blink. There is also a 0.5-second time delay after each key press.
