Journalism Research that Matters Valérie Bélair-Gagnon, Nikki Usher, 2021 It is now well established that the long time economic model on which the news industry has relied is no longer sustainable Facebook Google and declining levels of popular trust in the media have been major contributors to this situation Simultaneously the closure of local media outlets across the country has left many areas without access to regional news compounded the distance between media and publics and further eroded civic engagement Despite the looming crisis in journalism a research practice gap plagues the news industry This book argues that an underappreciated factor in the news crisis is a potentially symbiotic relationship between journalism studies and the industry that it researches As this book contends scholars must think about their work in a public context and journalists too need to listen to media scholars and take the research that they do seriously Including contributions from journalists and academics Journalism Research That Matters offers journalists a guide on what they need to know and journalism scholars a call to action for what kind of research they can do to best help the news industry reckon with disruption The book looks at new research developments surrounding audience behavior social networks and journalism business models the challenges that scholars face in making their research available to the public and to journalists the financial survival of quality news and information and blind spots in the way that researchers and journalists do their work especially around race diversity and inequality A final section includes contributions from journalists about how researchers can better engage on the ground with newsrooms and media professionals **Resources in Education** ,1996-04 The Ethics of Photojournalism Paul Martin Lester, 1990 The Handbook of Journalism Studies Karin Wahl-Jorgensen, Thomas Hanitzsch, 2019-06-20 This second edition of The Handbook of Journalism Studies explores the current state of research in

journalism studies and sets an agenda for future development of the field in an international context The volume is structured around theoretical and empirical approaches to journalism research and covers scholarship on news production news content journalism and society journalism and culture and journalism studies in a global context As journalism studies has become richer and more diverse as a field of study the second edition reflects both the growing diversity of the field and the ways in which journalism itself has undergone rapid change in recent years Emphasizing comparative and global perspectives this new edition explores Key elements thinkers and texts Historical context Current state of the field Methodological issues Merits and advantages of the approach area of study Limitations and critical issues of the approach area of study Directions for future research Offering broad international coverage from world leading contributors this volume is a comprehensive resource for theory and scholarship in journalism studies As such it is a must have resource for scholars and graduate students working in journalism media studies and communication around the globe
