Social Media Discourse, (Dis)identifications and Diversities

Sirpa Leppanen, Elina Westinen, Samu Kytola, 2016-12-08 This volume serves as an in depth investigation of the diversity of means and practices that constitute dis identification and identity construction in social media. Given the increasing prevalence of social media in everyday life and the subsequent growing diversity in the types of participants and forms of participation, the book makes the case for a rigorous analysis of social media discourses and digital literacy practices to demonstrate the range of semiotic resources used in online communication that form the foundation of dis identification processes. Divided into two major sections delineating between the dis identification of the self across various social categories and the dis identification of the self in relation to the other, the book employs a discourse ethnographic approach to highlight the value of this type of theoretical framework in providing nuanced descriptions of identity construction in social media and illuminating their larger long term societal and cultural implications. This volume is a key resource for researchers and students in sociolinguistics, discourse studies, computer mediated communication and cultural studies.
