in Africa Katie Wilson, Rania Mohamed Hassan Baleela, Heila Pienaar, Martie Van Deventer, Dale Peters, 2023-08-30 There is an ongoing transition in the research enterprise towards Open Science OS increasing transparency in researchers collaboration knowledge exchange and how science is organized The Open Access OA movement can be seen as a case study of the challenges that this transition can present For example despite all the advantages of OA and the fact that the concept is exceptionally strong as a principle it is yet to be implemented across all institutions particularly in Africa Even though

research productivity from the African continent has increased over the last two decades the global north still dominates the scholarly communication and publication sphere High article processing charges APCs can make it difficult for some African researchers to publish in highly rated and respected academic journals which are critical to their career advancement Fee waivers and discounts are available but eligibility and percentages vary by publisher and predatory publishing presents a challenge to African researchers In addition the exclusion of many African publication sources from the major bibliographic databases such as Scopus and the Web of Science skews and limits bibliometric analysis and influences the outcomes of world university rankings This Research Topic aims to investigate the transition to OS in the African continent This will include researchers and other stakeholders support services policy makers concerns regarding OS as well as the advantages it offers them Moreover the role of new technologies is also of interest in the implementation of OA as it is the knowledge divide between different countries and regions It is also crucial to address what needs to change in the research enterprise to make OS a worthwhile venture practice for most researchers and research role players and how they can cope with the contradictory challenges

Indefensible Paul Holden,2016-09-15 Although there is often opposition to individual wars most people continue to believe that the arms industry is necessary in some form to safeguard our security provide jobs and stimulate the economy Not only conservatives but many progressives and liberals support it for these reasons Indefensible puts forward a devastating challenge to this conventional wisdom which has normalised the existence of the most savage weapons of mass destruction ever known It is the essential handbook for those who want to debunk the arguments of the industry and its supporters deploying case studies statistics and irrefutable evidence to demonstrate they are fundamentally flawed both factually and logically Far from protecting us the book shows how the arms trade undermines our security by fanning the flames of war terrorism and global instability In countering these myths the book points to ways in which we can combat the arms trade s malignant influence reclaim our democracies and reshape our economies Infrastructure

Bonvillian, Charles Weiss, 2015-08-18 The American economy misses opportunities for innovation growth and job creation because of a neglected problem the resistance to innovation from Legacy sectors like energy manufacturing and health care which constitute most of our economy The book offers systematic strategies to overcome the structural obstacles to innovation in critically important Legacy sectors **Antarctic Krill and Interactions in the East Antarctic Ecosystem** So Kawaguchi, Sophie Bestley, Martin Cox, Kerrie M. Swadling, Elanor Bell, 2025-08-19 Antarctic krill *Euphausia superba* is the target of the largest

commercial fishery in the Southern Ocean Its abundance varies regionally and exhibits great interannual variability This natural variability combined with climate change effects could have substantial consequent impacts on krill predators and the magnitude of ecologically sustainable fishery catch limits Recent increase in the krill catch is due to technological developments in both harvesting and catch processing methods as well as interest in new products derived from krill e g dietary supplements and pet food The krill fishery is managed by the Commission for the Conservation of Antarctic Marine Living Resources CCAMLR The krill fishery first commenced in 1970 s off East Antarctica but the main fishing ground shifted to the South Atlantic sector from the 1990 s Interest to fish off East Antarctica has been expressed by CCAMLR Member nations in recent years and the krill fishery recommenced in Indian Ocean sector of East Antarctic sector in the 2016 17 fishing season Given the increase in recent commercial interest the trigger level total allowed catch in one of the management areas CCAMLR Subarea 48 1 has been reached seven times in the Southwest Atlantic the East Antarctic fishery is likely to expand in coming years CCAMLR employs an ecosystem based management approach This requires a wide range of data and information from across regional ecosystem components In the southwest Atlantic sector krill management is based on large scale krill biomass surveys undertaken in 2000 and 2019 together with various national Antarctic programs conducting annual regional scale monitoring this provides assessments of year to year variation of krill ecosystem parameters for CCAMLR to ensure harvesting is carried out in a sustainable manner Contrary to the relatively data rich Southwest Atlantic sector current precautionary catch limits for the krill fishery off East Antarctica are solely based on information collected through the two large scale multidisciplinary surveys conducted by Australia in Divisions 58 4 1 in 1996 and 58 4 2 in 2006 This Research Topic gathers up to date scientific analysis on the East Antarctic ecosystem arising from recent marine science voyages such as ENRICH Euphausiids and Nutrient Recycling In Cetacean Hotspots in 2019 and TEMPO Trends in Euphausiids off Mawson Predators and Oceanography in 2021 Our topic provides an opportunity to explore ecosystem wide scientific studies including non exclusively krill biomass ecosystem structure and interactions between krill krill predators oceanography and primary production to inform sustainable krill fishery management in the region
