been severely underfed during the long war To study rehabilitation Keys first needed to create a pool of starving test subjects Gathered in a cutting edge lab underneath the football stadium at the University of Minnesota Dr Keys test subjects forsook most food and were monitored constantly so that Dr Keys and his scientists could study the effects of starvation on otherwise healthy people While the weight loss of the men followed a neat mathematical curve the psychological deterioration was less predictable Some men drank quarts and quarts of water to fill their empty stomachs One man chewed as many as forty packs of gum a day One man mutilated himself to escape the experiment Ultimately only four of the men were expelled from the experiment for cheating a testament to the volunteers determination and toughness To prevent atrocities of the kind committed by the Nazi doctors international law now prevents this kind of experimentation on healthy people But in this remarkable book Todd Tucker captures a lost sliver of American history a time when cold scientific principles collided with living breathing human beings Tucker depicts the agony and endurance of a group of extraordinary men whose lives were altered not only for the year they participated in the experiment but forever *Harrison's Manual of Medicine: 16th Edition* Dennis L.
