Key To Solving The Ross Case:

Case-based Reasoning Janet L. Kolodner, 1988 **Dynamic Memory Revisited** Roger C. Schank, 1999-08-28 Roger Schank's influential book *Dynamic Memory* described how computers could learn based upon what was known about how people learn. Since that book's publication in 1982, Dr. Schank has turned his focus from artificial intelligence to human intelligence. *Dynamic Memory Revisited* contains the theory of learning presented in the original book, extending it to provide principles for teaching and learning. It includes Dr. Schank's important theory of case-based reasoning and assesses the role of stories in human memory. In addition, it covers his ideas on non-conscious learning, indexing, and the cognitive structures that underlie learning. By doing so, *Dynamic Memory Revisited* is crucial reading for all who are concerned with education and school reform. It draws attention to how effective learning takes place and provides instruction for developing software that truly helps students learn.

Determining a Critical-skill Hierarchy for Command Post of the Future (CPOF) Richard Catrambone, 2009. The Command Post of the Future (CPOF) is a dynamic visualization tool that supports collaborative decision making in tactical units. The system uses a customizable workspace based on the user's needs rather than a static format. While such an approach to digital systems design offers flexibility and generality of use, it might also increase the complexity of learning to use the interface. As a precursor to examining alternative training approaches for CPOF, this report documents an analysis of and hierarchical structure for underlying CPOF skills. A knowledge extraction process was conducted with CPOF domain experts (DEs) to uncover the knowledge needed to use CPOF. The DEs performed a series of tasks based on the practical exercises developed for training Soldiers. A Critical Skills Document was iteratively updated and reorganized to identify the major components of the system and the procedures for accomplishing various tasks. The Critical Skills Document represents CPOF skills in a way to show their generality and applicability. Instructional designers can use it to determine what to train as well as a guide for developing learning assessments. The findings provide a foundation for comparing training approaches for CPOF and similar digital systems.

Special Adjudication for Enforcement (SAFE). Final Report D. G. Morehead, 1976 *Research Report*, 2009 **Scientific and Technical Aerospace Reports**, 1979. Lists citations with abstracts for aerospace-related reports obtained from world-wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Special Adjudication for Enforcement (SAFE), 1976. Informal hearing system and retraining programs for drivers committing minor traffic infractions in Seattle. The American Digest Annotated, Key-number Series, 1913 *Case-based Reasoning* David B. Leake, 1996. It also presents lessons learned about how to design CBR systems and how to apply them to real-world problems. The final chapters include a perspective on the state of the field and the most important directions for future impact.
