Essentials of Business Statistics Wayne W. Daniel,1984      **Basic Business Statistics** Dean P. Foster,Robert A. Stine,Richard P. Waterman,2001-06-27 Preface Statistics is seldom the most eagerly anticipated course of a business student It typically has the reputation of being a boring complicated and confusing mix of mathematical formulas and computers Our goal in writing this casebook and the companion volume Business Analysis Using Regression was to change that impression by showing how statistics yields insights and answers interesting business questions Rather than dwell on underlying formulas we show how to use statistics to answer questions Each case study begins with a business question and concludes with an answer to that question Formulas appear only as needed to address the questions and we focus on the insights into the problem provided by the mathematics The mathematics serves a purpose The material in this casebook is organized into 11 classes of related case studies that develop a single key idea of statistics The analysis of data using statistics is seldom very straightforward and each analysis has many nuances Part of the appeal of statistics is this richness this blending of substantive theories and mathematics For newcomers however this blend is too rich and they are easily overwhelmed and unable to sort out the important ideas from nuances Although later cases in these notes suggest this complexity we do not begin that way      **Business Statistics** David M. Levine,Kathryn A. Szabat,David F. Stephan,2019-01-11 For one semester business statistics courses A focus on using statistical methods to analyze and interpret results to make data informed business decisions Statistics is essential for all business majors and Business Statistics A First Course helps students see the role statistics will play in their own careers by providing examples drawn from all functional areas of business Guided by the principles set forth by major statistical and business science associations ASA and DSI plus the authors diverse experiences the 8th Edition continues to innovate and improve the way this course is taught to all students With new examples case scenarios and problems the text continues its tradition of focusing on the interpretation of results evaluation of assumptions and discussion of next steps that lead to data informed decision making The authors feel that this approach rather than a focus on manual calculations better serves students in their future careers This brief offering created to fit the needs of a one semester course is part of the established Berenson Levine series Also available with MyLab Business Statistics By combining trusted author content with digital tools and a flexible platform MyLab personalizes the learning experience and improves
