January 2015 English Grade Boundaries:

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Postpositivist International Relations Theory Amartya Mukhopadhyay, 2023-10-16 This book discusses postpositivist theories foregrounding postpositivism against the reigning realist and positivist pluralist orthodoxies The book explicates seven theories not as disparate endeavours but as developments linked by a common thread that seeks to enunciate globalist emancipatory goals for the theoretical field and the world that these theories seek to change It focuses on the following themes feminism environmentalism or green theory the English School critical theory constructivism postmodernism and postcolonialism Additionally a separate chapter on globalization shows that while mainstream neo realist international relations theories respond hostilely to globalization and liberal pluralist theories react benignly to it postpositivist theories positively welcome it The book offers a competent meta theoretical gridwork showing on which side of the opposing disciplinary positions in the fourth debate each of the seven theories are located It is a comprehensive guide to the postpositivist restructuring of the discipline of international relations This book will be of interest to researchers and students of political science international relations history humanities and literature

CRPF Head Constable (Ministerial) & ASI (Steno) Exam (English Edition) - 7 Full Length Mock Tests and 5 Sectional Tests with Free Access to Online Tests EduGorilla Prep Experts, **Irish Identities** Raymond Hickey, Carolina P.

Amador-Moreno, 2020-01-20 This volume examines in depth the many facets of language and identity in the complex linguistic landscape of Ireland The role of the heritage language Irish is scrutinized as are the manifold varieties of English spoken in regions of the island determined by both geography and social contexts Language as a vehicle of national and cultural identity is center stage as is the representation of identity in various media types and text genres In addition the

volume examines the self image of the Irish as reflected in various self portrayals and references e g in humorous texts Identity as an aspect of both public and private life in contemporary Ireland and its role in the gender interface is examined closely in several chapters This collection is aimed at both scholars and students interested in language and identity in the multi layered situation of Ireland both historically and at present By addressing general issues surrounding the dynamic and vibrant research area of identity it reaches out to readers beyond Ireland who are concerned with the pivotal role this factor plays in present day societies Transcending Self and Other Through Akogare [Desire] Chisato Nonaka,2018-09-26 The Japanese concept of akogare has become well known in TESOL related literature in recent years usually in the context of interracial sexual desire In this far reaching new study of the internationalization of Japanese Higher Education Chisato Nonaka uses akogare as both an analytical lens and the object of enquiry and ultimately reconceptualises it as the creation of a space where individuals negotiate and transcend their ethnic national racial gender or linguistic identities The book innovatively engages with the often controversial binary of Japanese non Japanese and demonstrates how Japan often thought of as a homogenous nation may be at a critical crossroads where long held assumptions about a singular Japanese identity no longer hold true The book has profound implications for how internationalization can mean more than just the use of English **Lexical Tone Perception in Infants and Young Children: Empirical studies and theoretical**

perspectives Leher Singh,Denis Burnham,Jessica Hay,Liquan Liu,Karen Mattock,2019-11-20 In psycholinguistic research there has traditionally been a strong emphasis on understanding how particular language types are processed and learned In particular Romance and Germanic languages e g English French German have until recently received more attention than other types such as Chinese languages This has led to selective emphasis on the phonological building blocks of European languages consonants and vowels to the exclusion of lexical tones which like consonants and vowels determine lexical meaning but unlike consonants and vowels are based on pitch variations Lexical tone is pervasive it is used in at least half of the world languages Maddieson 2013 e g most Asian and some African Central American and European languages This Research Topic brings together a collection of recent empirical research on the processing and representation of lexical tones across the lifespan with an emphasis on advancing knowledge on how tone systems are acquired The articles focus on various aspects of tone early perception of tones influences of tone on word learning the acquisition of new tone systems and production of tones One set of articles report on tone perception at the earliest stage of development in infants learning either tone or non tone languages Tsao and Chen et al demonstrate that infants sensitivity to Mandarin lexical tones as well as pitch improves over the first year of life in native and non native learners in contrast to traditional accounts of perceptual narrowing for consonants and vowels Gtz et al report a different pattern of perception for Cantonese tones and further demonstrate influences of methodological approaches on infants tone sensitivity Fan et al demonstrate that sensitivity to less well studied properties of tone languages such as neutral tone may develop after the first year of life Cheng and Lee ask a

similar question in an electrophysiological study and report effects of stimulus salience on infants neural response to native tones In a complementary set of studies focused on tone sensitivity in word learning Burnham et al demonstrate that infants bind tones to newly learned words if they are learning a tone language either monolingually or bilingually although it was also found that object word binding was influenced by the properties of individual tones Liu and Kager chart a developmental trajectory over the second year of life in which infants narrow in their interpretation of non native tones Choi et al investigate how learning a tone language can influence uptake of other suprasegmental properties of language such as stress and demonstrate that native tone sensitivity in children can facilitate stress sensitivity when learning a stress based language Finally two studies focus on sensitivity to pitch in a sub class tone languages pitch accent languages In a study on Japanese children s abilities to recognise words they know Ota et al demonstrate a limited sensitivity to native pitch contrasts in toddlers In contrast Ramachers et al demonstrate comparatively strong sensitivity to pitch in native and non native speakers of a different pitch accent system Limburghian when learning new words Several studies focus on learning new tone systems In a training study with school aged children Kasisopa et al demonstrate that tone language experience increases children s abilities to learn new tone contrasts Poltrock et al demonstrate similar advantages of tone experience in learning new tone systems in adults And in an electrophysiological study Liu et al demonstrate order effects in adults neural responses to new tones discussing implications for learning tone languages as an adult Finally Hannah et al demonstrate that extralinguistic cues such as facial expression can support adults learning of new tone systems In three studies investigating tone production Rattansone et al report the results of a study demonstrating kindergartners asynchronous mastery of tones delayed acquisition of tone sandhi forms relative to base forms In a study interrogating a corpus of adult tone production Han et al demonstrate that mothers produce tones in a distinct manner when speaking to infants tone differences are emphasised more when speaking to infants than to adults Combining perception and production of tones Wong et al report asynchronous development of tone perception and tone production in children The Research Topic also includes a series of Opinion pieces and Commentaries addressing the broader relevance of tone and pitch to the study of language acquisition Curtin and Werker discuss ways in which tone can be integrated into their model of infant language development PRIMIR Best discusses the phonological status of lexical tones and considers how recent empirical research on tone perception bears on this question Kager focuses on how language learners distinguish lexical tones from other sources of pitch variation e g affective and pragmatic that also inform language comprehension Finally Antoniou and Chin unite evidence of tone sensitivity from children and adults and discuss how these areas of research can be mutually informative Psycholinguistic studies of lexical tone acquisition have burgeoned over the past 13 years This collection of empirical studies and opinion pieces provides a state of the art panoply of the psycholinguistic study of lexical tones and demonstrate its coming of age The articles in this Research Topic will help address the hitherto Eurocentric non tone language research emphasis and will contribute to an

expanding narrative of speech perception speech production and language acquisition that includes all of the world s languages Importantly these studies underline the scientific promise of drawing from tone languages in psycholinguistic research the research questions raised by lexical tone are unique and distinct from those typically applied to more widely studied languages and populations The comprehensive study of language acquisition can only benefit from this expanded focus Colorado School Laws Colorado,2018 **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events English Mechanic and Mirror of Science and Art ,1901 **The United States Catalog** Mary Burnham,Carol Hurd,1928 **Jean-Etienne Liotard** Royal Academy of Arts (Great Britain),2015 Jean Etienne Liotard was renowned during the eighteenth century for his exquisite portraits and works in pastel not to mention his outlandish Oriental garb He painted some of the most significant rulers and aristocrats of Europe including several members of the British royal family A peripatetic artist who worked in the Levant as well as major European capitals Liotard was born in Geneva and studied in Paris before travelling to Italy and then on to Constantinople in the train of British aristocratic Grand Tourists There he painted the local residents as well as the British community and adopted the eccentric style of dress that when he later visited London caused him to become known as The Turk This volume illuminates the career of this remarkable but now little known artist showcasing a variety of his extraordinary works including portraits drawings and enamels **The Journal of Arizona History** ,2018 Proceedings of the IRE. ,1958 **Current Law Index** ,1995 Legislative Synopsis and Digest ...
