

Potential Issue

Solution

Printer Wi-Fi setup mode timed out (Wireless light not blinking)

If the Wireless light is not blinking blue, the printer might not be in Wi-Fi setup mode. Restart setup mode:

1. If the control panel is not lit, press **X** to exit sleep mode.
2. Press and hold **i** for 5 seconds, then release once all the control panel buttons light up.
3. Press **Wi-Fi** and **X** at the same time once and then release the buttons. Wait for one minute until the Wireless light blinks blue.
4. Close and reopen HP Smart and try connecting again.

Computer or mobile device too far from printer

Move your computer or mobile device closer to the printer. Your device might be out of range of the printer's Wi-Fi signal.

Computer connected to a Virtual Private Network (VPN) or remote work network

Disconnect from a VPN before installing HP Smart software. You can't install apps from the Microsoft Store when connected to a VPN. Connect to the VPN again after finishing printer setup.

Note: Consider your location and the security of the Wi-Fi network before disconnecting from a VPN.

Wi-Fi turned off on computer (computer connected by Ethernet)

If your computer is connected by Ethernet, turn on the computer's Wi-Fi while setting up the printer. Disconnect the Ethernet cable temporarily to complete setup over Wi-Fi.

Bluetooth is turned off on your computer or mobile device

Turn on Bluetooth for the device being used to complete setup. For mobile devices, turn on Location services also. Bluetooth and Location help the software find your network and printer.

Location is turned off on your mobile device

Note: Your location is not being determined and no location information is being sent to HP as part of the setup process.
