Layard The Depression Report

Farhad Dalal

Layard The Depression Report:

CBT: The Cognitive Behavioural Tsunami Farhad Dalal, 2018-09-25 Is CBT all it claims to be The Cognitive Behavioural Tsunami Managerialism Politics and the Corruptions of Science provides a powerful critique of CBT's understanding of human suffering as well as the apparent scientific basis underlying it The book argues that CBT psychology has fetishized measurement to such a degree that it has come to believe that only the countable counts It suggests that the so called science of CBT is not just bad science but corrupt science The rise of CBT has been fostered by neoliberalism and the phenomenon of New Public Management The book not only critiques the science psychology and philosophy of CBT but also challenges the managerialist mentality and its hyper rational understanding of efficiency both of which are commonplace in organizational life today The book suggests that these are perverse forms of thought which have been institutionalised by NICE and IAPT and used by them to generate narratives of CBT's prowess It claims that CBT is an exercise in symptom reduction which vastly exaggerates the degree to which symptoms are reduced the durability of the improvement as well as the numbers of people it helps Arguing that CBT is neither the cure nor the scientific treatment it claims to be the book also serves as a broader cultural critique of the times we live in a critique which draws on philosophy and politics on economics and psychology on sociology and history and ultimately on the idea of science itself It will be of immense interest to psychotherapists policymakers and those concerned about the excesses of managerialism Psychoanalytic Insights into

Fundamentalism and Conviction Lesley Murdin, 2020-06-01 Psychoanalytic Insights into Fundamentalism and Conviction The Certainty Principle examines the role of and need for certainty in mental life addressing questions raised by fundamentalism and extremism and exploring its relation to human nature Murdin proposes a new synthesis in which certainty itself can be a cause of suffering and part of a defensive manoeuvre and considers how the need for certainty can be managed in a positive way rather than creating fear and extreme emotional responses Illustrated throughout with examples from psychotherapy practice literature and international politics this book considers how the quest for certainty dominates much of human thinking Murdin examines personal relationships including politics and religion where assumptions are taken for granted but function to hide fears and doubts and argues that fundamentalist elements can generate harm in anyone but can be mitigated with understanding and work in therapy Psychoanalytic Insights into Fundamentalism and Conviction helps to identify the underlying convictions that are causing mental harm It is essential reading for psychotherapists psychoanalysts and counsellors in practice and in training and will be of interest to readers interested in fundamentalist states of mind
